## Unit Overview

---

In this unit, students will explore

EU:

Relationships are influenced by a wide variety of factors, individuals, and behaviors.

There are factors that contribute to making healthy decisions about sex.

Potential solutions to health issues are dependent on health literacy and locating resources accessible in a community.

Awareness of potential risks factors and knowledge of strategies to evaluate choices and potential consequences can help to reduce negative impacts when confronted with difficult or unsafe situations.

Individuals may experience interpersonal and/or sexual violence for a variety of reasons, but the victim is never to blame.

Technology can impact the capacity of individuals to develop and maintain healthy behaviors and interpersonal relationships.

The use of alcohol and other drugs (including cannabis products) can result in social, emotional, and physical harm to oneself and others.
