Unit Overview

Measurement of Length

Students build on their understanding of measuring lengths using non-standard units to learn to measure using standard units including inches, feet, yards, centimeters, and meters throughout this unit.

- **Measurement Tools:** Students are introduced to several measurement tools within this unit.
- **Comparing Measurements:** As students become comfortable measuring objects, they then compare the lengths of two objects. Students measure both objects and then compare the measurements to determine the difference.
- **Relating Measurements:** Students are asked to relate these measurements to each other. By understanding how these measurements relate, students are able to make more accurate measurements.
- **Estimate Measurements:** Students are asked to estimate the length of objects prior to measuring, using a standard measurement tool. This skill can help students determine the appropriateness of their precise measurements.

What Students Are Learning

- Students measure length in customary and metric units.
- Students compare lengths in customary and metric units.
- Students examine the relationship among inches, feet, and yards, and between centimeters and meters.
- Students estimate length in customary and metric units
- Students solve word problems involving length.

Number Routines

- Let's Count
- Decompose It
- About How Much?
- Where Does It Go?
- Notice & Wonder
- Numberless Word Problem

Standards

| | |
|--------------|---|
| MATH.2.M.A.1 | Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. |
| MATH.2.M.A.2 | Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen. |

| | |
|--------------|--|
| MATH.2.M.A.3 | Estimate lengths using units of inches, feet, centimeters, and meters. |
| MATH.2.M.A.4 | Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit. |
| MATH.2.M.B.5 | Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem. |
| MATH.2.M.B.6 | Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram. |
