## Unit Overview

---

### Money and Time

In this unit, students learn to count money and to tell and write time to the nearest five minutes. Skip counting is employed in both topics. Students will build on the knowledge they gained in earlier grades as they work through money and time problems:

- **Money:** Besides counting coins and bills to find the value of a group of coins or bills, students also explore different combinations of bills or coins to show a given amount of money. Students apply addition and subtraction skills when they solve problems involving money.
- **Time:** In Grade 1, students learned to tell time to the hour and half hour. In this unit, students extend their earlier work with time by writing and telling time to the nearest five minutes. Throughout this unit, students use both analog clocks and digital clocks to show time.

### What Students Are Learning

- Students determine the value of groups of coins or bills.
- Students use analog and digital clocks to tell and write time to the nearest five minutes.
- Students determine whether the time of an event is a.m. or p.m.

### Number Routines

- Build Fluency
- About How Much?
- Greater Than or Less Than
- Find the Missing Values
- Notice & Wonder
- Which Doesn't Belong?
