## Unit Overview

---

### Use Place Value to Fluently Add and Subtract within 1,000

In this unit, students extend their knowledge of place value to 3- and 4-digit numbers and apply this knowledge to adding and subtracting 3-digit numbers. Students use place value to form estimates of sums and differences by rounding and using compatible numbers. They will extend their understanding of addition properties by discovering the order or grouping of three addends does not change the sum. Students also identify even and odd addition patterns to help check whether a sum is accurate.

Students use their understanding of place value to learn strategies, such as decomposing and adjusting, and then apply these strategies to help add and subtract more fluently. They also use their understanding of addition and subtraction to solve two-step word problems.

Students will extend their understanding of place value, addition, and subtraction learned in previous grades. These include:

- **Place value:** Students represent 3- and 4-digit number using standard form, expanded form, and word form.
- **Round multi-digit numbers:** Students round multi-digit numbers to the nearest 10 and nearest 100.
- **Addition:** Students use additional properties and strategies to add 3-digit numbers.
- **Subtraction:** Students use strategies to subtract 3-digit numbers

### What Students Are Learning

- **Place-Value Structure** - Students extend their understanding of place value through thousands.
- **Addition** - Students add within 1,000 using properties of addition and addition strategies.
- **Subtraction** - Students use strategies to subtract within 1,000.

### Number Routines

- Where Does It Go?
- Would You Rather?
- Notice & Wonder
- Numberless Word Problem
- Is It Always True?
- Which Doesn't Belong?

## Standards

MATH.3.OA.D.9	Identify arithmetic patterns (including patterns in the addition table or multiplication table) and explain them using properties of operations.
MATH.3.NBT.A.1	Use place value understanding to round whole numbers to the nearest 10 or 100.
MATH.3.NBT.A.2	With accuracy and efficiency, add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
