Brief Summary of Unit

Art History Part 2 will provide students with an introduction to college coursework in art history. In this course, students will examine major forms of artistic expression from the Renaissance to the present. Their explorations will enable them to develop an understanding and knowledge of architecture, sculpture, painting, and other art forms within diverse historical and cultural contexts. It will also provide them with the opportunity to explore an area that is only cursorily explored through other curricula in more depth. They will learn to look at works of art critically, with intelligence and sensitivity, and to analyze what they see.

In this unit, students will explore Neo-classical and Romantic art and architecture. They will understand the history and contributions to the development of art and architecture that came out of these eras. In particular, students will explore how greatly expanded interests in science, philosophy, as well as the advent of revolution impacted the art, and the role of artists, and art during the era.
