Essential Questions

- • How did the art and architecture of the Gothic and Proto Renaissance have impact on the social, political, economic, and/or religious issues of each era?
- • How were the art and architecture of the Gothic and Proto Renaissance impacted by the social, political, economic, and/or religious issues of each era?

Essential Understandings

- • Amid the social, economic, and religious upheavals of the 14th century, there emerged a new interest in human values and the everyday world, inspired and guided by classical examples.
- • Beginning in the 13th century, a combination of political, social, economic, religious, and cultural factors contributed to a shift that began to occur in European culture in the period known as the Proto

Renaissance.

- • Geometry played both a symbolic and a practical role in Gothic art and architecture.
- • In the second half of the 13th century, many architects throughout Western Europe constructed or reconstructed churches opre francigeno (in the French manner) - that is, in the Gothic style of France. The structures were usually modified, however, according to local preferences.
- • The Gothic age was a time of profound change in Europe. The Hundred Years' War began, shattering the peace between France and England. The Black Death swept over Western Europe and killed at least a quarter of its people. Opposing popes resided in Rome and in Avignon in southern France during the political-religious crisis known as the Great Schism.
- • The move toward the Proto Renaissance culture occurred first in Italy, where the growth of a new secular culture fueled an interest in the classical past.
- • The shift from monasteries and pilgrimage churches to secular cities with enormous cathedrals created a social and economic structure that could support artisans and craftsmen.
- • The transition from the Medieval to the Renaissance period occurred in the 14th century. The medieval preoccupation with otherworldly values was gradually modified to include a new interest in the natural world. This was coupled with a revival of interest in the art of classical antiquity (ancient Roman sculpture and architecture), examples of which were available for artists to study. The result was a new more naturalistic art in which both figures and their surroundings are made to appear more as they might in the real world.
