## Transfer

---

## Essential Questions

---

- • How did scientific discoveries give rise to Impressionist art?
- • What innovations promoted the dramatic move toward vertical structures in architecture in the late 19th century?
- • What prompted the move in art toward Modernism?
- • Why are such varied styles of art combined into a category referred to as Post-Impressionism?

## Essential Understandings

---

- • Although Post-Impressionist styles vary greatly, the common thread is the artist's interest in exploring emotional, psychological, and issues of aesthetics that could not be accommodated by the impressionist style.
- • Impressionist artists created art that explored the reality of light, color, and visual reality based upon scientific discoveries concerning optics, and the function of the human eye.
- • Iron and steel permitted the construction of larger, stronger, and more fire-resistant structures.
- • New philosophies, rapid advancements in science, technology, and photography, as well as continual economic, political, and social changes gave rise to the development of modernism in art. Modernist artists sought to capture the images and sensibilities of their age while also subjecting the

premises of art itself to critical examination. Two major modernist styles were Realism and Impressionism.
