## **Essential Questions/Enduring Understandings**

---

- Singable and memorable melodies are formulaic and have specific characteristics.
- What do I hear when I listen to music?
- What musical elements make a good melody?

## **Students Will Know/Students Will Be Skilled At**

---

- A musical phrase ends with a resting point, or a cadence.
- Composing is about a balance between repetition and variation.
- Composing singable/playable melodies.
- How to listen to and look at notation of melodies and describe their characteristics.
- Melodies are related to the scale or key they are written in.
- Melodies can be broken into phrases and have resting points called cadences.
- Melodies have line, shape, and contour, which can be described as scalar, conjunct, or disjunct.
- The rules for writing a "good" singable/playable and memorable melody.
- The smallest recognizable unit of music is a motif.

## **Learning Plan**

---

- Preview the essential questions and return to them throughout the course, in discussion and written assignments.
- Students and teacher perform composed melodies and critique them according to the guidelines.
- Students are given the opportunity to write a melody, beginning under strict guidelines which may include, only four measures long, must start and end on the tonic note of the key, the ending note is on a strong beat, the motion is scalar or jumps of thirds that outline a triad, there is as repeated motif, etc.
- Students continue practicing melody writing with longer pieces and assignments, culminating in a final melody project that might run 24-32 measures, demonstrating understanding of the guidelines for writing melodies. Students and teacher create a rubric together for the assessment of the final melodies.
- Teacher and students examine various major melodies in different keys and time signatures, performed and written in notation and discuss their characteristics.

- Teacher provides students with vocabulary and terminology related to melodies including, conjunct/disjunct, phrase, cadence point, scalar or step-wise, repetition and variation.

## **Evidence/Performance Tasks**

---

Performing Arts students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Evidence of progression may be demonstrated in divergent ways through the Artistic Processes of Creating, Performing/ Presenting/ Producing, Connecting, and Responding.

- Listening to musical examples students will draw and discuss the shape and contour of the melody they are listening to.
- Listening to musical examples students will write descriptive statements about the melody they are listening to, using accurate musical terminology
- Students compose a longer final melody project that might run 24-32 measures in length and is performed for the class by students and teacher. Students create rubric and self-assess their melody project.
- Students compose a variety of melodies that conform to the guidelines for singable/playable and memorable melodies. Students can describe what they composed using appropriate and accurate musical terminology.
