

Unit 01: Listening to Music

Content Area: **Music**
Course(s):
Time Period: **Marking Period 1**
Length: **2 weeks, then ongoing throughout the course**
Status: **Published**

Brief Summary of Unit - Revised June 2021

Music is an aural art form. Those who study, practice, perform, or simply appreciate music should be able to critically listen to music. Critical listening goes beyond taste, fondness, and preference of certain music. Critical listening is a skill that when honed, allows the listener to consider the effects of specific elements of music and understand why music is appreciated and enjoyed, and consequently, why it elicits certain responses from an audience. Listening is an essential part of understanding how music is constructed and composed.

Essential Questions/Enduring Understandings

- Music can be described as having objective qualities which allow us to think and speak about music in a critical way.
- What do I hear when I listen to music?
- What is music?
- Why does music often elicit an emotional response from the listener?

Students Will Know/Students Will Be Skilled At

- How to listen to music for the elements listed above.
- How to write about what they hear in music.
- Key terms and vocabulary, including pitch, rhythm, tempo, dynamics, melody, harmony, tonality, texture, form, timbre, instrumentation.
- Understanding why they like a piece of music, or why they do not like a piece of music.

Learning Plan

- Periodically throughout the course teacher assigns listening assignments, with both live and recorded examples, and students describe the music/sounds they hear. Teacher provides both open-ended and specific, as well as objective and subjective questions for students to which students respond in narrative form.
- Preview the essential questions and return to them throughout the course, in discussion and written assignments.
- Students create/perform/bring in their own musical examples to discuss why they like them. The class practices critical listening and dissects the objective elements from which the piece is composed.
- Teacher leads discussion trying to answer the philosophical question, "what is music?" Students discuss and write reflections.
- Teacher provides guided listening examples in class, asking students "what do you hear?" Teacher and students begin to label and define the objective elements of music as they listen to a variety of musical examples from classical, popular, and folk traditions.

Evidence/Performance Tasks

Performing Arts students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Evidence of progression may be demonstrated in divergent ways through the Artistic Processes of Creating, Performing/Presenting/Producing, Connecting, and Responding.

- Create a personal, working definition of "music."
- Define and explain the basic elements of music.
- Identify the basic elements of music within heard music, using appropriate vocabulary, both in discussion and in written form through listening assignments.
- Listen to music with a critical ear.
- Understand and provide objective and subjective responses to heard music.

Materials

The materials used in this course allow for integration of a variety of instructional, supplemental, and intervention materials that support student learners at all levels in the school and home environments. Associated web content and media sources are infused into the unit as applicable and available.

- A wide variety of music recordings, found and shared online, including music from classical, popular, and folk traditions, found and shared by both teacher and students.
