The composition will have a minimum of a melody and a chordal accompaniment and students will use a music notation software to complete this task. The compositions will be performed at the end of the course and students can write them for instruments that they play or with which they are familiar.

## **Essential Questions/Enduring Understandings**

---

- Following the conventions and guidelines of music theory can make composing music more difficult, but more cohesive and interesting in the end.
- How does a composer write a large piece of music?
- How does melody, harmony, and rhythm interact to create a cohesive piece of music?
- What do I hear when I listen to music?

## **Students Will Know/Students Will Be Skilled At**

---

- Composition is a balance between a creative and formulaic exercise.
- How to determine the phrase structure and form of the composition to be written.
- How to expand upon a melody or harmonic progression they have already written.
- How to sketch out a composition to get a sense of cadence points and how long the composition might be.
- How to synthesize the musical knowledge and skills they have to create a large piece of music.

## **Learning Plan**

---

- Preview the essential questions and return to them throughout the course, in discussion and written assignments.
- Students begin to input their work on music notation software. Teacher provides space, time, resources, and support for these work sessions, including individual check-in sessions.
- Students complete their written compositions and rehearse them with their performers.

- Students create a preliminary sketch of their composition, outlining the form and main themes. Teacher and the rest of the class provide feedback.
- Students experiment with how they get started in the composition process. Teacher provides a reflection sheet for students to record their creative process.
- Students perform their compositions and write critiques. Students write critiques as if they were doing a listening assignment, looking at specific objective elements of the musical composition.
- Teacher provides examples of how composers approach the creative process of composition, including video and print examples. Invite the class to explore a variety of cultural approaches including classical, popular, folk, and non-Western traditions.
- Together, teacher and students create rubric for the composition project. What elements will be required and what will we look for in determining if the piece is successful?

## **Evidence/Performance Tasks**

---

- Students will create sketches for their composition which include short harmonic progressions, melodies, motifs, and themes that could be expanded and developed within the piece.
- Students will write a complete composition. The composition will follow a specified form and be composed in music notation software.
- Students will write a description and critique of their composition based on the musical elements present.
- Students will write critiques of each other's composition using objective statements about the musical elements presented.
