Brief Summary of Unit - Revised June 2021

Developing students' cognitive and intuitive awareness is essential to musicianship. Transcribing heard pitches and rhythms, as well as producing sound from musical notation is a dynamic set of aural skills. Taking dictation and sight-singing are important tools for all musicians and takes years to develop, but this course offers a strong foundation in these essential musical skills.

Essential Questions/Enduring Understandings

- A constant pulse and the perception of pitch is essential to successful music-making.
- Developing one's aural skills improves all aspects of a person's musicianship.
- How do composers represent sound traveling through time?

- Singing is a more complex type of musical cognition and develops one's ability to hear pitch.
- What do I hear when I listen to music?

Students Will Know/Students Will Be Skilled At

- How to sing a scale and apply the notes of the scale to a sung melody using solfege.
- How to transcribe pitch from dictation, utilizing solfege.
- How to transcribe rhythm from dictation, keeping a steady pulse and recognizing longer and shorter notes.
- How to use a time signature to organize rhythm and sound within a measure.
- How to use counting systems as tools for interpreting rhythm within a meter.
- Recognizing intervallic relationships aurally, from one note to the next.

Learning Plan

- By the end of the semester, students have worked up to taking 4-measure diatonic dictation and singing 4-measure diatonic melodies.
- Preview the essential questions and return to them throughout the course, in discussion and written assignments.
- Students begin to write down the short patterns performed by the teacher, using accurate notation, without pitch.
- Students regularly perform written melodies and harmonies with solfege syllables. These exercises may be found in various resources or created by the teacher. The exercises increase in difficulty as student ability increases.
- Students write their own melodies for sight singing and dictation and engage their classmates in dictation with them or perform them for the class.
- Teacher and students discuss the significance of a time signature in the context of given rhythm patterns.
- Teacher presents short sight-singing examples, in varying degrees of difficulty, that students perform in groups and individually.
- Teacher sings pitch patterns in solfege to the students, who are asked to sing them back in order to build aural vocabulary.
- Teacher speaks rhythm patterns to the students, who are asked to speak them back in order to build aural vocabulary.
- Teacher writes down some of the pitch patterns on the staff so students can recognize the symbols that represent the sounds.
- Teacher writes down some of the rhythm patterns so students can recognize the symbols that represent the sounds.
- Using solfege charts, hand signs, and regular practice, students become proficient in singing intervallic relationships between notes within a major scale.

Evidence/Performance Tasks

Performing Arts students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Evidence of progression may be

demonstrated in divergent ways through the Artistic Processes of Creating, Performing/ Presenting/ Producing, Connecting, and Responding.

- Evaluate the accuracy of student's own, and others, performances of rhythm and pitch patterns.
- Perform pitch patterns as a class and individually with accuracy.
- Perform rhythm patterns as a class and individually with accuracy.
- Sing 4-measure diatonic melodies at sight with accuracy.
- Sing the major scale and its intervallic relationships accurately and in tune.
- Take down a 4-measure diatonic dictation, pitch and rhythm, with accuracy.
- Write accurate rhythms and pitches derived from aural dictation.
