

Unit 3: Cold War Through the 1970s Via A Global Lens

Content Area: **Social Studies**
Course(s):
Time Period: **Marking Period 2**
Length: **5 Weeks**
Status: **Published**

Summary

In the two part United States History sequence (US History I and US History II), students serve as novice historians as they engage in historical inquiry and refine key skills necessary for success in the 21st century. In order to do so, the curriculum is designed around three central pillars: core understandings that cut across eras, development of transferable skills, and connecting historical and current events.

Throughout the course, students will be presented with opportunities to practice and refine the following Social Studies skills:

- Comparison - Compare and contrast different events, cultures, geographic areas, ideas, values, and institutions
- Causation - Evaluate the relationship between historical causes and effects and distinguish between long term and immediate effects
- Interpretation - Interpret information from a wide variety of primary, secondary, and tertiary sources, including but not limited to those listed [here](#).
- Sourcing - identify and explain the significance of a source's point of view, purpose, historical context, and intended audience
- Textual Analysis - Critically read various texts and identify text-based evidence
- Argumentation - Develop a historically defensible claim and support it with evidence, both in writing and orally
- Analytical Writing - Formulate an argument in response to a prompt question that is supported with evidence
- Speaking and Listening - Engage in collaborative discussions by building on others' ideas and concretely and persuasively expressing one's own

The following core understandings cut across historical eras. As such, students have the opportunity to draw connections between events, analyze historical patternization, and speculate about future occurrence in our republic:

1. While marked by unique circumstances, periods of migration and subsequent settlement are often motivated

by a desire of one group to expand opportunities and access, often at the expense of another.

2. While America's commitment to democracy has served as a guiding principle, a source of stability, and an example to other countries, its inconsistent implementation has also resulted in tension, conflict, and unequal access at home and abroad.

3. Significant social change requires the coordinated and sustained efforts of countless individuals and groups; this change is often gradual, requires the use of various tactics, and is met with resistance that must then be counteracted.

4. Power relations between individuals, groups, or governments are ever-changing; attempts to exert influence, expand access, and assert control often lead to both intended and unintended consequences.

5. The American experience is rooted in the cultures, traditions, and contributions of various individuals and groups who have intersectional identities; a discussion of the contributions of diverse cultures, groups, and individuals offers a more complete understanding of US history.

This unit is part of the larger aforementioned course sequence and specifically focuses on the Cold War where students will understand the changing relationship between the United States and Soviet Union after World War II. Students will understand that a fear of communism as a new threat to democracy shaped the United States' foreign policies towards European, Asian, and Middle Eastern nations allied with, or targeted by, the Soviet Union. By the end of this unit, students will be able to evaluate the major global conflicts that define the Cold War, such as the Korean War, Cuban Missile Crisis and Bay of Pigs, and the Vietnam War. Students will be able to identify similarities and differences between motivations, accomplishments and challenges of various leaders and strategies within these events by corroborating evidence, comparing and contrasting primary source documents, and developing and supporting an argument in writing and orally.

The ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an increasingly globalized world is essential to students' post-secondary success. The skills and content of this unit and the curriculum as a whole encourage students to think critically about important issues, engage in the processes of problem solving, and develop civic competence as part of preparation for college, career, and/or civic life.

This course fulfills one of three units in Social Studies course work required by both Cranford High School and the state of New Jersey for graduation.

This unit is aligned to the English Language Development (ELD) standards for kindergarten through grade 12 since multilingual learners develop content and language concurrently, with academic content in a classroom where the language of instruction is English. As a result, language learning and language as a means for learning academic content are interchangeable. The following ELD standards are relevant for this unit and

course of study:

- Standard 1: Language for Social and Instructional Purposes: English language learners communicate for social and instructional purposes within the school setting.
- Standard 5: Language for Social Studies: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

The standards in this unit reflect a developmental progression across grade levels and make interdisciplinary connections across content areas including the humanities, technology, career readiness, cultural awareness, and global citizenship.

Learning Plan

This unit plan includes but is not limited to the following learning strategies:

- **Potsdam Conference Report Card:** Students will read the agreements made at the Potsdam conference and give each agreement a “grade” supported by reasoning defending the grade given. They will then make predictions as to how each agreement will impact U.S. foreign relations.
- **Iron Curtain/ Cold War Alliances Mapping Activity:** Students will create a map that identifies nations that are aligned in NATO and Warsaw as well as draw a line that represents the “Iron Curtain.” Students will assess the benefits and detriments to these alliance lines and how the United States, its allies, and its opponents will be impacted by these alliances.
- **Impact of the Arms Race:** Students will read about the Soviet Union creating the atomic bomb and MAD, investigate the case of Julius and Ethel Rosenberg, and analyze photographs of American propaganda and practices (such as school bomb drills) to analyze how tensions and fear were heightened during the start of the Cold War.
- **Korean War Inquiry-Based Lesson:** Students will address the question, “To what extent was U.S. involvement in the Korean War a defense of democracy?” by analyzing the Korean governments supported by both the United States and Soviet Union. Working in pairs, students will investigate clips from an NPR podcast on the Korean War and primary and secondary source articles to answer the focus question, using evidence and reasoning to support their argument.
- **CIA Coups Fishbowl:** Students will address the question: “To what extent were CIA coups of independent nations during the Cold War justified?” by investigating in small groups case studies involving the CIA’s overthrowing of international governments. Students will read and annotate primary and secondary sources involving coups of Iran, Guatemala, Congo, Indonesia, and Chile to draw conclusions on CIA activity and whether or not their actions were acceptable. The class will then

engage in a fishbowl discussion addressing the central question, and use evidence from their research to defend their positions.

- **Cuban Missile Crisis Simulation:** Students will be assigned a role in Kennedy’s cabinet and read a profile relating to their figure’s stance on the Cuban Missile Crisis. Students will then work with their group to attempt to “solve” the Cuban Missile Crisis, where they will receive scenarios based on real-life issues of the Crisis and have to decide how to solve them. Afterwards, students will reflect on how they handled the situation, factors that contributed to the event, and the impact of the Cuban Missile Crisis.
- **Gulf of Tonkin Resolution:** Students will corroborate primary sources regarding Johnson’s reasoning for going to war in Vietnam and draw conclusions on U.S. motivations for involvement in the Vietnam War.
- **Vietnam War Tactics Stations Activity:** Students will work in groups to investigate the tactics used by the United States government including Operation Rolling Thunder, Napalm, Agent Orange, Land Mines, and the North Vietnamese Tet Offensive. Students will examine the ways in which Vietnamese civilians were impacted by the war tactics used in the Vietnam War and discuss the ethical problems with using certain war tactics.
- **My Lai Massacre Reflection:** Students will first listen to a survivor of the My Lai Massacre recount his experience, then read an article on the My Lai Massacre. Students will then write a reflection on the repercussions of the event, addressing questions such as, “How should the US or United Nations have responded to this event? To what extent do you agree with the investigation results? To what extent has the United States acknowledged and taken accountability for their role in mass atrocities such as this during times of war?”

Note: Other strategies to address the learning objectives may include, but are not limited to direct instruction, primary and secondary source analysis (including annotations, critique, questioning and close reading strategies), self and peer review, think-pair-share activities, creating visual representations, debates, film analysis, Socratic seminars, small group discussions, simulations, mapping activities, jigsaw activities, gallery walks, web quests, and/or inquiry or problem based learning projects.

Assessment

When taking a Social Studies course, students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Many of the performance tasks below can be implemented as formative and/or summative assessments. As teachers strive for students to demonstrate proficiency, they will need to create additional or alternative assessments based on demonstration or absence of skill.

Formative Assessments:

Do Nows/ Exit Slips, Class Activities, Homework, Quizzes

Summative Assessments:

Unit Tests including Multiple Choice, Free (Paragraph-length) response questions, and Source Analysis

Alternative Assessments:

-Cold War Essay: Students will craft a five paragraph essay that addresses Core Understandings #2 and #4 through the prompt “To what extent are United States attempts to exert influence over nations justified in the context of the Cold War?” Students will consider the reasons for and consequences of American involvement in foreign affairs during the Cold War, and use examples from class activities and notes to support their responses.

Benchmark Assessment:

Written Responses to Document Analysis Questions
