Content Area: **English Language Arts**
Course(s):
Time Period: **Marking Period 1**
Length: **4-5 Weeks**
Status: **Published**

Brief Summary of Unit

Summary: Students use web-platforms and online tools to create and maintain high-interest, informative, meaningful digital blogs (web logs) about academic topics that matter to them. Students will find and link to mentor blogs that are effective in achieving their purpose, whether to entertain, inform, or persuade. Students will then create, maintain, and develop their own blogs that utilize the skills and strategies adapted from their chosen mentor texts while developing their own personal voice and knowledge bases.

Interdisciplinary Connections and Career Readiness: This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered two times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

The performance tasks listed below are examples of the types of assessments teachers may use in the classroom and the data collected by the district to track student progress.

- • Develop a portfolio of mentor blogs that match students' intended purpose (e.g. Student who plans to write a sports blog might collect example of model sports blogs and annotate according to strengths and weaknesses)
- • Score websites according to a set of criteria developed as a class, including, but not limited to, readability, visual appeal, organization, responsible attribution of sources.
- • Write and maintain an ongoing blog that incorporates qualities of model blogs. Weekly posts should include links to outside sources and images, for example.

Learning Plan

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during this class targets not only comprehension, but also analysis. Students may read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Students will be taught how to speak and listen in addition to being assessed on these skills.

- • Analyze blogs to determine purpose, and critically analyze how intended purpose is achieved
- • Critique and comment consistently on peer blogs
- • Curate a portfolio of model blogs to use as mentor texts in a Google Doc
- • Design and maintain an ongoing blog about a topic of student interest and choice using platforms such as Wordpress, Weebly, or Google Sites. Include audio, image, and video features in personal blog
- • Evaluate the elements of an author's craft in a website (including, but not limited to, design, presentation, audio, video, typography, layout, user experience, tone,)
- • Research and develop list of guidelines for responsible internet writing, including how to avoid plagiarism, how to link sources, cite images.
- • Use MAPS strategy to analyze blogs: Mode, Media, Audience, Purpose, Situation (See teacher resources, Troy Hick's Digital Writing)
