

Unit 4: Podcasting with Power

Content Area: **English Language Arts**
Course(s):
Time Period: **Marking Period 2**
Length: **3-4 Weeks**
Status: **Published**

Brief Summary of Unit

Students will explore and critically study the use of podcasts as a tool for communication of ideas. In particular, they will investigate the wide range genres and styles of podcasts as well as the unique strategies and tools that podcast hosts use to communicate their messages. Specifically, the study will focus on determining which strategies and styles are most effective based on audience and purpose. Students will choose a mentor text and create a podcast on a topic of their choice that is modeled after the mentor podcast.

Interdisciplinary Connections and Career Readiness: This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Revision: June 2023

Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

- • Develop a portfolio of mentor podcasts that match students' intended purpose (e.g. Student who plans to produce a comedy podcast might collect example of model comedy podcasts and annotate according to strengths and weaknesses)
- • Write and maintain an ongoing podcast that incorporates qualities of model podcast. Weekly shows should include recurring segments, guests hosts, theme music, for example.

Learning Plan

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during this class targets not only comprehension, but also analysis. Students may read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Students will be taught how to speak and listen in addition to being assessed on these skills.

- • Analyze podcasts to determine purpose, and critically analyze how intended purpose is achieved
- • Curate a portfolio of model podcasts to use as mentor texts
- • Develop and produce an ongoing podcast show using Audacity or Soundcloud about a topic of student interest and choice.
- • Evaluate a website's use of various elements of an author's craft (including, but not limited to, theme music, sound effects, recurring features and segments, guest hosts, interviews, voice, tone.)
- • Hold regular discussion in which peers comment and provide meaningful feedback about peer shows
- • Reflect meaningfully on personal growth as a speaker and host at the middle and end of the semester
- • Understand the responsible use of digital media through podcasting with purpose for an intended audience; understand and apply proper netiquette; recognize the social dangers of internet use; apply safety practices for effective viewing and listening.
- • Use MAPS strategy to analyze podcasts: Mode, Media, Audience, Purpose, Situation (See teacher resources, Troy Hick's Digital Writing)
