Brief Summary of Unit

Focus: “Writing is an art. But when it is writing to inform, it comes close to being a science.” - Robert Gunning

Summary: Students will understand the value of writing to inform and explain in clear, accurate language that highlights real-world insights. Informing and explaining reinforces how something works, develops, or occurs. Clarity of word choice as well as the use of transitional words and phrases will be paramount in this unit. As such, students will engage in reading about writing techniques in addition to reading mentor texts from a variety of sources in order to gain a thorough understanding of audience, purpose, and tone. Students will closely analyze the use and structure of language to determine what constitutes effective writing while demonstrating command of standard English grammar, usage, spelling, and punctuation in composing a variety of responses to both creative and practical, real-world writing prompts. In order to share critical interpretations of strong writing and to offer feedback to their peers, students will actively engage in whole class discussions, small group conversations, as well as teacher-student conferences as they allow for an enhanced understanding of different perspectives on writing.

Interdisciplinary Connections and Career Readiness: This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.
