Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

Learning Plan

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during this class targets not only comprehension, but also analysis. Students may read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Students will be taught how to speak and listen in addition to being assessed on these skills.
