Content Area: **English Language Arts**  
Course(s):  
Time Period: **Marking Period 2**  
Length: **3-4 Weeks**  
Status: **Published**

## Brief Summary of Unit

---

Throughout the course, students will become critical and thoughtful analyzers in sports literature. During this unit, each student will choose one issue to examine about a self-selected sport through traditional library and authentic real-world research. Students will also read one full-text selection regarding this sport as a precursor to this researched project. The focus for the study and the intended outcome will be determined by the student. Options include, but are not limited to, traditional research paper, public service announcement, advertising campaign, or film project. Students will present their analysis of this issue to the class. As a result, students will become savvier, more informed observers of current issues in American sports.

## Interdisciplinary Connections and Career Readiness:

This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

determined by the student.

## **Learning Plan**

---

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during this class targets not only comprehension, but also analysis. Students may read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Students will be taught how to speak and listen in addition to being assessed on these skills.

- • Analyze issue and task to determine purpose, and critically analyze how intended purpose will be achieved
- • Composing: this step may include writing an initial draft or creating an uncut video.
- • Critique: Peers can contribute and critique ideas on web-log through Learning Management System (LMS). Hold regular discussion in which peers comment and provide meaningful feedback.
- • Final revision and presentation of persuasive project to class
- • Immersion: Read samples of thesis statements.
- • Immersion: Show samples of digital video. Evaluate each film's use of various elements of an author's craft (including, but not limited to, images, sequencing, transitions, music, sound effects.)
- • Planning: this step could include outlining the paper with sources or writing a storyboard for digital video.
- • Preview the essential questions and connect to learning throughout previous units.
- • Reading: study a chosen text (from classroom library or school media center) about a self-selected sport considering issues.

- • Reflection: consider growth throughout the semester and during the project
- • Research: study topics using subscription databases in the media center; conduct non-traditional research, as needed.
