BRIEF SUMMARY OF UNIT

FOCUS: "I regard the theatre as the greatest of all art forms, the most immediate way in which a human being can share with another the sense of what it is to be a human being." Thornton Wilder

Summary: This unit centers on the importance of effective communication including dramatic monologues, duo performances, para language, and nonverbal movement skills. The unit enables students to use interpretation and analytical skills to develop voice and movement delivery techniques. The students will understand the importance of communication by analyzing various excerpts of plays and monologues, presenting Dramatic Performances, and critiquing and reflecting peers and self. Students will actively engage in both large and small collaborative discussions and dialogues that enhance critical thinking and analysis of textual works. Students may complete para language and pantomine activities, characterization analysis, and character studies. This unit will consist of a competitive speech event which provides an opportunity for students to rehearse various speaking techniques to engage, motivate, and/or persuade an audience. Personalized Learning allows students to self reflect and assess their own listening and speaking skills using the development and competition of a electronic porfolio. Students will understand that developing communication skills builds and maintains relationships, facilitates innovation, builds effective partnerships, and develops leadership.

Interdisciplinary Connections and Career Readiness: This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Learning Plan

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during the nineth through twelfth grade targets not only comprehension, but also analysis. Students will read both long-and short-form, exceptted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition.

Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Learning expectations in Forensics: Advanced Speech and Debate will demonstrate close and analytical reading to comprehend a range of increasingly complex literary and informational texts. The lessons and activities will produce effective and well-grounded writing for a range of purposes and audiences. The students will employ effective speaking and listening skills for a range of purposes and audiences, including persuasive, motivational, and informative. The presentations will include debatable categories, extemporaneous speeches, dramatic performances, and original oratory. The course will provide students active engagement in research /inquiry to investigate topics and to analyze, integrate, and present information.

Teachers may personalize instruction during this unit and address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students. Personalized Learning allows students to self reflect and assess their own reading, writing, listening, viewing and speaking skills using the development and competition of a electronic porfolio, journal writing, writer's workbooks, independent reading, and/or book talks.

Students will be taught how to speak and listen in addition to being assessed on these skills.

This unit of study will focus on "Dramatic Performance" and is centered on the quotation from Thorton Wilder, "I regard the theatre as the greatest of all art forms, the most immediate way in which a human being can share with another the sense of what it is to be a human being."

Teachers may create lessons with the additional subthemes: Dramtic Interpretation, Duo Interpretation, and Humorous Interpretation.

The students will actively engage in both large and small collaborative discussions and dialogues that enhance critical thinking and analysis of textual works. Students may complete analytical analysis, persuasive writing, synthesis essays, database research, and journal writing.

Students will participate in individual, partner and group activies including Literature Circles, Socratic Discussions, Jigsaw Methods, and other Cooperative Learning activities.
