BRIEF SUMMARY OF UNIT

FOCUS: “It is better to debate a question without settling it than to settle a question without debating it.” [Joseph Joubert](#)

Summary: This unit centers on the importance of effective communication in organized communication, persuasion, rhetoric, and argument. The students will understand the importance of debating and questioning their peers in a respectable and constructive format. Students will actively engage in both large and small collaborative discussions that enhance critical thinking of various perspectives to an argument. Students will develop academic research skills for arguments, cross-examinations, concessions, counter-arguments, rebuttals, and summations. Students may complete a Lincoln Douglas Value Debate, Congressional Debate, and/or Public Forum Policy Debate. This unit will consist of a competitive speech event which provides an opportunity for students to rehearse various speaking techniques to engage, motivate, and/or persuade an audience. Personalized Learning allows students to self reflect and assess their own listening and speaking skills using the development and competition of a electronic portfolio. Students will understand that developing debating skills increases self-confidence, facilitates innovation, and develops leadership.

Interdisciplinary Connections and Career Readiness: This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Essential Questions/Enduring Understandings

- How does understanding harms, inherency, solvency, and significance assist with winning a debate?
- How does a team work collaboratively on an argument?
- How does one construct an argument?
- How does a debate flow or progress?
- How does one write a counterargument?
- How does one write extemporaneous cross-examination questions during a debate?
- How does presentation (speaking tone/enunciation/carriage/confidence) influence an intended audience?
- What communication skills do I need to develop to participate in a cooperative group?
- What different roles are often found in groups?

- the logical development of ideas helps communicate information to an audience.
- communication challenges us to behave ethically.

Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered two times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

LEARNING PLAN

Instructional time will be dedicated to whole class text instruction, collaborative learning, and independent and personalized learning. The intent is for student-readers to have clear modelling through whole-class instruction. These strategies are practiced in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9-12; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during the ninth through twelfth grade targets not only comprehension, but also analysis. Students will read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is

examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modelling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Teachers may personalize instruction during this unit and address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students. Personalized Learning allows students to self reflect and assess their own reading, writing, listening, viewing and speaking skills using the development and competition of a electronic portfolio, journal writing, writer's workbooks, independent reading, and/or book talks.

Students will be taught how to speak and listen in addition to being assessed on these skills.

Learning expectations in Forensics: Advanced Speech and Debate will demonstrate close and analytical reading to comprehend a range of increasingly complex literary and informational texts. The lessons and activities will produce effective and well-grounded writing for a range of purposes and audiences. The students will employ effective speaking and listening skills for a range of purposes and audiences, including persuasive, motivational, and informative. The presentations will include debatable categories, extemporaneous speeches, dramatic performances, and original oratory. The course will provide students active engagement in research /inquiry to investigate topics and to analyze, integrate, and present information.

This unit of study will focus on "Debate" and is centered on the quotation from Joseph Joubert, "It is better to debate a question without settling it than to settle a question without debating it."

Teachers may create lessons with the additional Debate Styles: Student Congress, Policy Debate, Public Forum, Lincoln Douglas Debate.

The students will actively engage in both large and small collaborative discussions and dialogues that enhance critical thinking and analysis of textual works. Students may complete analytical analysis, persuasive writing, synthesis essays, database research, and journal writing.

Students will participate in individual, partner and group activities including Literature Circles, Socratic

Discussions, Jigsaw Methods, Debates, Mock Congress, and other Cooperative Learning activities.
