This unit gives an overview of various dance composition tools and techniques and how they can be utilized across all dance genres. Solo, duet and small group work will be generated using improvisational exercises and structural outlines. Students will feel more comfortable generating and performing movement of their own invention.

DA.9-12.1.1.12prof.Cr1a	Explore a variety of stimuli (e.g., music, sound, literary forms, notation, natural phenomena, experiences, current news, social events) for sourcing movement to develop an improvisational or choreographed dance study. Analyze the process and the relationship between the stimuli and the movement.

### **Students Will Know/Students Will Be Skilled at**

---

Students will be able to create, manipulate and perform for feedback short phrases of movement based on compositional prompts.

Students will practice the skill of collaborative art making through working with peers to create movement phrases.

Students will build a 'compositional toolkit from which to draw ideas and prompts.

June 2024

## **Learning Plan**

---

Students will discuss the essential questions and brainstorm about best practices in composing movement.

Students will participate in improvisational exercises through teacher or movement card prompts that ask students: to move in contrasting ways in terms of elements (quick-sustained, bound-free, direct-indirect and light-strong); in reaction to specific types of music; using an image or photo (fill in the negative space, outline the shape of the image using your body).

Students will participate in small movement problem solving through teacher or movementcard prompts that ask students: to follow a 'dance map' that involves various symbols for movement and outlines the physical space; to use 'dance libs' to create a short phrase of movement using different actions, levels, shapes and pathways; to work with a partner or small group to create unison, canon, call and response,

Students will participate in discussions regarding their work using prompts such as: 'I found it interesting when..' 'I saw the decision made to...' 'it would be interesting if..'

Students will be instructed on ways to manipulate existing movement to make longer and more intricate phrase-work, including use of repetition, reversal, retrograde, canon, transposing, directional change and tempo change.

Students will take part in solo, partner and small group compositions with self and peer analysis.

### **Suggested Strategies for Modification**

---

Represent information in multiple formats and media.

Provide multiple pathways for students' actions and expressions.

Provide multiple ways to engage students' interests and motivation

Each student will be on their own individualized path, as composition is a creative and personal process. Students can keep flashcards with them explaining the details of composition and will be given written and visual opportunities for further study.

Injured students will write or record in class observations. Injured students are expected to participate in some way in the composition. If they are in a small group they will give direction to the rest of the group and aid in the editing process. If a student's injury is isolated to one part of the body, the student is expected to participate in the composition assignment and not use that body part.
