Essential Questions

- Why is rhythm so important to music?
- How do composers represent sound traveling through time?
- What is a time signature and how does it function?
- What is the hierarchy of notes and rests which represent notational rhythm and how do they relate to a time signature?
- Why is it vital for a performing ensemble to keep a constant pulse?
- What is the responsibility of each ensemble member in maintaining accurate rhythms and tempo?
What is the responsibility of the conductor?

Evidence/Performance Tasks

- Perform rhythms as a class and individually, at sight and rehearsed, with accuracy.
- Determine an appropriate time signature for an unmarked piece of written music.
- Determine an appropriate time signature for an aural musical example.
- Write accurate rhythms derived from aural dictation.
- Evaluate the accuracy of their own and others performances of rhythms.

- Compose accurate rhythms within a specified meter.
- Determine the appropriateness of using rubato in the repertoire and changing or being flexible with the tempo or pulse for interpretation purposes.

Learning Plan

- Teacher speaks rhythms to the students, who are asked to speak them back in order to build aural skills.
- Teacher and students discuss the significance and meaning of the numbers in a time signature.
- Teacher and students discuss the types of notes and rests and how they function in a specific time signature/meter. Students will create note value charts.
- Students regularly perform written rhythms by speaking, singing on a single pitch, or singing written specified pitches. Rhythms may be found in various sight-singing books, created by the teacher, or isolated from choral repertoire.
- Students complete various music theory worksheets and packets, some developed by the teacher.
- Students and teacher will engage in kinesthetic and eurhythmic activities, which relate to specific time signatures/meters, rhythm, tempo, ties, and pulse.
- Students experience various meters and rhythms within the choral repertoire the class prepares for performance.
- Teacher isolates difficult rhythmic issues within the choral repertoire to aid students in successful performance.
- Teacher records various rehearsals and the concert performance. The class listens, critiques, and assesses the rhythmic accuracy of the performances.
- Through discussion, teacher and students will determine the appropriateness of rubato in the performance of specific choral repertoire.
- Students write a short final composition, demonstrating their understanding of time signature/meter and rhythms. The composition will be performed for the class so it may be critiqued for accuracy and effectiveness in its use of rhythm.

Students will know and be skilled at..

- How to identify any time signature and understand its meaning.
- How to interpret and perform rhythms and rests in relationship to meter.
- several counting systems as tools for interpreting rhythm within a meter.
- How to interpret tempo markings from largo to presto.
- How to maintain a steady rhythmic pulse in performance.
- How to interpret tempo changes within a piece of music, including but not limited to ritardando, accelerando, piu mosso, fermata, and a tempo.
- How to take short rhythmic dictation.
- How to communicate with and respond to the gestures of a conductor.
- Accuracy in the interpretation of rhythm is essential to performing music properly.
- A constant pulse is essential to successful music-making.
- Performers must follow a composer or arranger's notation and markings, but the performers and

conductor have the freedom to be flexible with the tempo or pulse (rubato) for interpretation purposes.
