

Unit 3: Taking Care of Our World

Content Area: **Social Studies**
Course(s):
Time Period: **Trimester 3**
Length: **Trimester 3**
Status: **Published**

Summary

In Kindergarten Social Studies, students examine maps, geography, needs and wants. With a particular focus on belonging, both to a community and within the world. Developmentally appropriate lessons related to spatial awareness, financial responsibility, and civic competence are also included as introductions to these important topics that will be explored in greater detail in grades one and two.

Throughout the course, students will be presented with opportunities to practice and refine the following Social Studies skills:

- Comparison - Compare and contrast different events, cultures, geographic areas, ideas, values, and institutions
- Perspective - Interpret different perspectives on a particular topic recognizing that views, experiences, or understandings may vary, but still be valued
- Causation - Evaluate the relationship between causes and effects and discuss continuities and changes over time
- Contextualization - Identify and explore the context (historical, geographic, situational, etc.) of different events, places or locations, symbols, or traditions

This unit is part of the larger aforementioned course sequence and specifically focuses on “Taking Care of Our World” where students will learn; where people live; maps are symbols of a place, geography can be used to identify culture; economic decisions are made by individuals and government (communities); and individuals make decisions based on their needs and wants. By the end of this unit, students will be able to; explain why a location is a good place to live; identify landmarks and symbols on a map; recognize cultural identity on a global level; and explain the choices and value between needs and wants in their individual lives.

The ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an increasingly globalized world is essential to students’ post-secondary success. The skills and content of this unit and the curriculum as a whole encourage students to think critically about important issues, engage in the processes of problem solving, and develop civic competence as part of preparation for eventual college, career, and/or civic life.

Revision Date: August 2022

Standards

This unit includes instructional materials that highlight the history and contributions of Asian Americans and Pacific Islanders in accordance with the New Jersey Student Learning Standards in Social Studies.

In accordance with New Jersey's Chapter 32 Diversity and Inclusion Law, this unit includes instructional materials that highlight and promote diversity, including: economic diversity, equity, inclusion, tolerance, and belonging in connection with gender and sexual orientation, race and ethnicity, disabilities, and religious tolerance.

This unit is aligned to the English Language Development (ELD) standards for kindergarten through grade 12 since multilingual learners develop content and language concurrently, with academic content in a classroom where the language of instruction is English. As a result, language learning and language as a means for learning academic content are interchangeable. The following ELD standards are relevant for this unit and course of study:

- Standard 1: Language for Social and Instructional Purposes: English language learners communicate for social and instructional purposes within the school setting.
- Standard 5: Language for Social Studies: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

The standards in this unit reflect a developmental progression across grade levels and make interdisciplinary connections across content areas including the humanities, technology, career readiness, cultural awareness, and global citizenship.
