

Unit 2: Me on the Map

Content Area: **Social Studies**
Course(s):
Time Period: **Trimester 2**
Length: **January-April**
Status: **Published**

Summary

In the first grade Social Studies course, students begin to explore their civic and cultural responsibilities to the various communities they operate in. The course begins by examining a citizen’s rights and responsibilities, specifically related to our republic, and the different ways we can serve our communities. The course continues with students expanding their geographic skills and understandings through “Me on the Map” activities and building cultural competencies by comparing and contrasting the experiences of students their age in different parts of the world. Students conclude their studies by refining their chronological thinking and exploring continuities and changes over time via “then and now” comparisons. By learning about the different communities they operate in, students further affirm their own identities and expand their understanding of places and people outside of their direct experiences.

Throughout the course, students will be presented with opportunities to practice and refine the following Social Studies skills:

- Comparison - Compare and contrast different events, cultures, geographic areas, ideas, values, and institutions
- Perspective - Interpret different perspectives on a particular topic recognizing that views, experiences, or understandings may vary, but still be valued
- Causation - Evaluate the relationship between causes and effects and discuss continuities and changes over time
- Contextualization - Identify and explore the context (historical, geographic, situational, etc.) of different events, places or locations, symbols, or traditions

This unit is part of the larger aforementioned course sequence and specifically focuses on “Me on the Map” where students expand their geographic and spatial understandings by examining maps and learning about different communities outside of their own. By the end of this unit, students will be able to use a compass rose and map key to read maps, explore different communities around the world to discover how geography affects the way people live, and respectfully discuss different family and cultural traditions with their peers.

The ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an increasingly globalized world is essential to students’ post-secondary success. The skills and content of this unit and the curriculum as a whole encourage students to think critically about important issues, engage in the processes of problem solving, and develop civic competence as part of preparation for eventual college, career, and/or civic life.

Standards

In accordance with New Jersey’s Chapter 32 Diversity and Inclusion Law, this unit includes instructional materials that highlight and promote diversity, including: equity, inclusion, tolerance, and belonging.

This unit includes instructional materials that highlight the history and contributions of Asian Americans and Pacific Islanders in accordance with the New Jersey Student Learning Standards in Social Studies.

This unit further reflects the goals of the Holocaust Education mandate where students are able to identify and analyze applicable theories concerning human nature and behavior; understand that genocide is a consequence of prejudice and discrimination; understand that issues of moral dilemma and conscience have a profound impact on life; and understand the personal responsibility that each citizen bears to fight racism and hatred whenever and wherever it happens.

This unit is aligned to the English Language Development (ELD) standards for kindergarten through grade 12 since multilingual learners develop content and language concurrently, with academic content in a classroom where the language of instruction is English. As a result, language learning and language as a means for learning academic content are interchangeable. The following ELD standards are relevant for this unit and course of study:

- Standard 1: Language for Social and Instructional Purposes: English language learners communicate for social and instructional purposes within the school setting.
- Standard 5: Language for Social Studies: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

The standards in this unit reflect a developmental progression across grade levels and make interdisciplinary connections across content areas including the humanities, technology, career readiness, cultural awareness, and global citizenship.
