

Unit 2: Communities Near and Far

Content Area: **Social Studies**
Course(s):
Time Period: **Trimester 2**
Length: **November-January**
Status: **Published**

Summary

In the second grade Social Studies course, students further refine the civic and cultural competencies that they developed in first grade. The course begins by examining citizenship through the lens of civic responsibilities. Through the presentation of different examples, students learn that the US was founded on principles of democracy, which is reflected in our government's system. Students examine the different rights they have, but also that they have certain responsibilities to both our local and global communities. During the second unit, students investigate how communities differ, but also share similarities. Students engage in a comparative analysis of the experiences of students in Cranford to those in other parts of the world, allowing them to refine key Social Studies skills, expand their geographic understanding, and build cultural appreciation. During the third unit, students learn how different members of the community help produce goods and services that are then consumed. Students also explore ways they can make financially responsible decisions. In the final unit, students serve as novice historians as they complete a comparative investigation of Cranford today and in the past. By examining key primary source documents, students are able to identify the extent of continuity and change in their town.

Throughout the course, students will be presented with opportunities to practice and refine the following Social Studies skills:

- Comparison - Compare and contrast different events, cultures, geographic areas, ideas, values, and institutions
- Perspective - Interpret different perspectives on a particular topic recognizing that views, experiences, or understandings may vary, but still be valued
- Causation - Evaluate the relationship between causes and effects and discuss continuities and changes over time
- Contextualization - Identify and explore the context (historical, geographic, situational, etc.) of different events, places or locations, symbols, or traditions

This unit is part of the larger aforementioned course sequence and specifically focuses on “Communities Near and Far” where students will understand that a community, whether urban, rural, or suburban, is a place where people live, work and play together. By the end of this unit, students will be able to recognize the different roles communities serve, identify communities as rural, urban, or suburban, use map reading skills to explore various places, conduct an inquiry to explain how geography affects communities, and complete a comparative analysis of different communities.

The ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an increasingly globalized world is essential to students' post-secondary success. The skills and content of this

unit and the curriculum as a whole encourage students to think critically about important issues, engage in the processes of problem solving, and develop civic competence as part of preparation for eventual college, career, and/or civic life.

Revision Date: August 2022

Standards

This unit includes instructional materials that highlight the history and contributions of Asian Americans and Pacific Islanders in accordance with the New Jersey Student Learning Standards in Social Studies.

In accordance with New Jersey’s Chapter 32 Diversity and Inclusion Law, this unit includes instructional materials that highlight and promote diversity, including: equity, inclusion, tolerance, and belonging.

This unit further reflects the goals of the Holocaust Education mandate where students are able to identify and analyze applicable theories concerning human nature and behavior; understand that genocide is a consequence of prejudice and discrimination; understand that issues of moral dilemma and conscience have a profound impact on life; and understand the personal responsibility that each citizen bears to fight racism and hatred whenever and wherever it happens.

This unit is aligned to the English Language Development (ELD) standards for kindergarten through grade 12 since multilingual learners develop content and language concurrently, with academic content in a classroom where the language of instruction is English. As a result, language learning and language as a means for learning academic content are interchangeable. The following ELD standards are relevant for this unit and course of study:

- Standard 1: Language for Social and Instructional Purposes: English language learners communicate for social and instructional purposes within the school setting.
- Standard 5: Language for Social Studies: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

The standards in this unit reflect a developmental progression across grade levels and make interdisciplinary connections across content areas including the humanities, technology, career readiness, cultural awareness, and global citizenship.

- How do we use maps?
- What is geography and how does it influence how and where people live?
- Why is cultural tolerance important?

Enduring Understandings:

- A community is a place where people live, work and play together. There are many different types of communities, including urban, rural, suburban.
- A map is a drawing of a place or a community. Maps include different tools that people can use to develop spatial and geographic understanding.

- Different types of maps can offer specific information.
- How to show respect and acceptance for others' beliefs and traditions.
- Cultures have similarities and differences - they can be compared and contrasted.

Students will be skilled at:

- Categorizing features of the Earth surface (i.e. landforms, bodies of water)
- Recognizing the different elements of a community as a place where people live, work, play, and solve problems together.
- Identifying communities as rural, urban, or suburban.

- b. Class Discussion: The instructor will lead the class in a discussion about the similarities and differences between living in China and living in America. The instructor can make a Venn Diagram with the class to create a visual representation of the discussion. (The instructor may repeat the reading and class discussion with the other three books: *Ready to Read: Living in... South Africa*, *Ready to Read: Living in... Brazil*, *Ready to Read: Living in... Italy*)

Assessment

When taking a Social Studies course, students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Many of the performance tasks below can be implemented as formative and/or summative assessments. As teachers strive for students to demonstrate proficiency, they will need to create additional or alternative assessments based on demonstration or absence of skill.

Formative Assessments:
