

Unit 3: My Economic Responsibilities

Content Area: **Social Studies**
Course(s):
Time Period: **Trimester 2**
Length: **February-March**
Status: **Published**

Summary

In the second grade Social Studies course, students further refine the civic and cultural competencies that they developed in first grade. The course begins by examining citizenship through the lens of civic responsibilities. Through the presentation of different examples, students learn that the US was founded on principles of democracy, which is reflected in our government's system. Students examine the different rights they have, but also that they have certain responsibilities to both our local and global communities. During the second unit, students investigate how communities differ, but also share similarities. Students engage in a comparative analysis of the experiences of students in Cranford to those in other parts of the world, allowing them to refine key Social Studies skills, expand their geographic understanding, and build cultural appreciation. During the third unit, students learn how different members of the community help produce goods and services that are then consumed. Students also explore ways they can make financially responsible decisions. In the final unit, students serve as novice historians as they complete a comparative investigation of Cranford today and in the past. By examining key primary source documents, students are able to identify the extent of continuity and change in their town.

Throughout the course, students will be presented with opportunities to practice and refine the following Social Studies skills:

- Comparison - Compare and contrast different events, cultures, geographic areas, ideas, values, and institutions
- Perspective - Interpret different perspectives on a particular topic recognizing that views, experiences, or understandings may vary, but still be valued
- Causation - Evaluate the relationship between causes and effects and discuss continuities and changes over time
- Contextualization - Identify and explore the context (historical, geographic, situational, etc.) of different events, places or locations, symbols, or traditions

This unit is part of the larger aforementioned course sequence and specifically focuses on “My Economic Responsibilities” where students will know that the availability and desirability of a good or service determine its price and that there are different ways to secure goods and services, such as borrowing or saving. By the end of this unit, students will be able to identify different ways to secure goods and services, find out how goods are made by putting the steps of their production in order, recognize that availability and desirability determine the price of goods and services, and evaluate the costs and benefits of economic choices.

The ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an increasingly globalized world is essential to students' post-secondary success. The skills and content of this

unit and the curriculum as a whole encourage students to think critically about important issues, engage in the processes of problem solving, and develop civic competence as part of preparation for eventual college, career, and/or civic life.

Standards

In accordance with New Jersey’s Chapter 32 Diversity and Inclusion Law, this unit includes instructional materials that highlight and promote diversity, including: equity, inclusion, tolerance, and belonging.

This unit is aligned to the English Language Development (ELD) standards for kindergarten through grade 12 since multilingual learners develop content and language concurrently, with academic content in a classroom where the language of instruction is English. As a result, language learning and language as a means for learning academic content are interchangeable. The following ELD standards are relevant for this unit and course of study:

- Standard 1: Language for Social and Instructional Purposes: English language learners communicate for social and instructional purposes within the school setting.
- Standard 5: Language for Social Studies: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

The standards in this unit reflect a developmental progression across grade levels and make interdisciplinary connections across content areas including the humanities, technology, career readiness, cultural awareness, and global citizenship.
