Brief Summary of Unit

The ability to communicate effectively in more than one language and the perspectives brought about by an understanding of other cultures are vital to the success of our students now and as they advance through the program/grade levels in preparation for a future in a variety of careers. When taking this course, students develop their understanding of the interrelationship between language and culture leading to a purposeful appreciation of cultural diversity. The goal of the elementary Spanish program in kindergarten is to give them exposure to the language and culture of a world outside of their own as they build upon much of the same content as they are learning in their kindergarten classroom.

Kindergarten-aged students become familiar with the pronunciation of Spanish vowels and sounds as their auditory skills are attuned to hearing Spanish spoken in the classroom setting. Beginning Spanish instruction in Kindergarten allows for the inception of language proficiency with an emphasis on aural skills, as well as providing a gradual introduction to aural literacy.
