Brief Summary of Unit

The ability to communicate effectively in more than one language and the perspectives brought about by an understanding of other cultures are vital to the success of our students now and as they advance through the program/grade levels in preparation for a future in a variety of careers. When taking this course, students develop their understanding of the interrelationship between language and culture leading to a purposeful appreciation of cultural diversity. The goal of the elementary Spanish program in grades one and two is to support students in attaining the Novice Low Performance Expectation in the three communicative modes by the end of grade two.

Grade one students will begin to develop an ear for the pronunciation of Spanish vowels and sounds. They will begin to increase their auditory skills in responding appropriately to their teacher's target language usage. As the year progresses, students begin to use the language at the word level to indicate numbers, colors, animals, months, classroom objects and engage in greetings.

Grade two students will continue to develop an ear for the pronunciation of Spanish vowels and sounds. They will continue to increase their auditory skills in responding appropriately to their teacher's target language usage verbally and physically. As the year progresses, students will use the language at the word level or with short phrases to review past learning and share information about themselves and their personal preferences.
