## **BRIEF SUMMARY OF UNIT**

---

In the grade 6 conversational World Language courses, students develop language skills through the modes of interpersonal communication, presentational speaking, presentational writing, interpretive listening and interpretive writing. Emphasis is placed on the most frequently used words in the target language with the goal of 90% immersion, preparing students to become conversationally proficient. Attention is paid to the role of contextualized grammar to promote authentic communication. Global perspective is encouraged through exposure to the target cultures, their values, and traditions. Content presented in this course is rooted in the six AP Language and Culture themes as the organizing vehicle to develop knowledge.

- **Beauty and Aesthetics:** Exploring artistic expression, architecture, and aesthetic concepts.
- **Contemporary Life:** Analyzing daily life, travel, sports, and lifestyle choices.
- **Families and Communities:** Investigating societal structures, childhood, and global communities.
- **Global Challenges:** Addressing environmental, political, and socio-economic issues.
- **Language and Culture:** *Note: This has replaced the former Personal and Public Identities theme, focusing on linguistics, customs, and the global reach of the target language.*
- **Science and Technology:** Examining innovations, health care, and ethical questions

The depth and breadth through which the themes are presented are based on the proficiency level target for the students at this level (Novice Low/Mid). The pacing of the unit is contingent on student acquisition of the language as related to their ability to communicate spontaneously, read, write and engage in discussion on the topic(s) presented. As a result, pacing is not fixed to a specific timeline, but rather adapts to ensure students achieve true functional proficiency before moving forward.

The ability to communicate effectively in more than one language and the perspectives brought about by an understanding of other cultures are vital to the success of our students in a variety of careers. When taking this course, students develop their understanding of the interrelationship between language and culture leading to a purposeful appreciation of cultural diversity. Students who demonstrate proficiency in a second language in addition to English, may qualify for the New Jersey State Seal of Biliteracy, an honor that sets them apart from others and makes them marketable when pursuing a career and when engaging with home and global communities.

Interpretive Mode of Communication (IPRET)

Learners construct meaning from target language materials listened to, viewed, and/or read on culturally relevant and highly contextualized topics. Learners rely mostly on memorized or familiar, high-frequency words and phrases with supports. Learners draw heavily on their own background and cultural knowledge. With the described language characteristics, learners develop:

### **Intercultural Competence (IC)**

## **LEARNING PLAN**

---

Practices that promote (interpretive communication) LISTENING AND READING:

- Students are introduced to / continue to be exposed to and incorporate high frequency words such as: THERE IS/ARE, TO BE PLEASING/TO LIKE, TO BE, TO WANT, TO HAVE, TO GO, TO PUT, TO BE ABLE TO, TO GIVE, TO SAY, TO KNOW (something), TO SEE, TO GIVE ) as they may come up naturally during class discussions.
- High Frequency Word List, Japanese NL/NM:  
<https://docs.google.com/document/d/1jDPLs9He5W8W5t2gcVeOshmhKadwaimRFeYNwZ66NIY/edit?usp=sharing>
- Comprehensible target language input (CI) is provided by the teacher through reading and listening on a consistent basis.
- To reinforce literacy skills, students receive reinforcement in the mechanics of decoding, reading for meaning and using context clues as their teacher leads them in reading and understanding various texts in the target language independently and/or as a class.
- Provide the following to help students to continue to develop literacy skills: short stories, news articles, embedded readings, excerpts from novels, basal text, rooted in high frequency vocabulary and expressions.

Practices that promote (presentational communication) STUDENT PRODUCTION of SPOKEN and WRITTEN language:

- Differentiate expectations for student output (in speaking and writing).
- Teach students to utilize charts and tables as references to assist students in visualizing and understanding correct verb usage and structure, as needed.
- Provide opportunities for students to narrate about own life, experiences, and events.
- Encourage and provide learning platforms for students to give preferences, opinions, and make persuasive arguments.
- Provide students with the vocabulary necessary to inform, describe, and explain and provide practice in opportunities to do so.
- Give opportunities for students to present to an in class and/or external audience orally and/or in writing
- Provide sentence starters or sentence frames to model the use of sentences with accuracy and clarity.

Practices that promote (interpersonal communication) SPONTANEOUS AND INTERACTIVE PRODUCTION of SPOKEN or WRITTEN language:

- Daily classroom routines are incorporated that reinforce student ability to use situationally appropriate

vocabulary and expressions when responding to routinely asked questions and/or unit related questions.

- Personalize questions and model accuracy to support students when they are interacting / providing responses to questions posed.
- Facilitate class generated discussions and stories to personalize the learning process and encourage student to student interaction..
- Provide cues to help students see that their message may not be clear; include facial expressions, repetition of the message, follow up or clarifying questions, playing out the message or restating the message to indicate an obvious mistake, and pop-up grammar.
- Provide content that links to past learning and promotes reinforcement /. repetition.
- Encourage repeating, rephrasing, and clarifying to promote student ability to negotiate meaning until mutual understanding is achieved.
- Provide opportunities for students to engage in face-to-face conversation and practice using the target language via real world examples of communication in person and via technology-based tools.

## **EVIDENCE / PERFORMANCE TASKS**

---

When taking a World Language, students demonstrate differentiated proficiency according to their ability to answer the essential questions through formative and summative assessments. Evidence of progression in the communicative modes (Interpretive, Presentational and Interpersonal) demonstrates the development of communicative proficiency over time. The performance tasks below are implemented as benchmark assessments and, based on individual student readiness and performance, can be implemented as formative and/or summative assessments. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill. The following proficiency targets guide teachers and students in working to approach, meet and even exceed proficiency levels by the end of the course.

Proficiency Targets: Grade 6 -- NL/NM

Interpretive Assessments are designed to measure STUDENT COMPREHENSION within LISTENING AND READING:

Students will interpret what they hear and read at their own rate, with the goal of personal improvement as students advance through ACTFL PROFICIENCY levels

Presentational Assessments are designed to measure STUDENT PRODUCTION of SPOKEN and WRITTEN

language (rehearsed)

Students will produce output (speaking and writing) at their own rate, with the goal of personal improvement as students advance through ACTFL PROFICIENCY levels

Interpersonal Assessments are designed to measure SPONTANEOUS STUDENT PRODUCTION of SPOKEN or WRITTEN language (no preparation)

Students will produce output (speaking) and engage in conversation at their own rate, with the goal of personal improvement as students advance through ACTFL PROFICIENCY levels

Grade reporting for World Language classes reflects each individual student's ability to demonstrate proficiency in the following areas: Interpretive Listening/Reading, Interpersonal speaking, Presentational Writing/Speaking, Participation and Performance. The amount of formative and summative experiences in using the language within each communicative mode is based on the number of years the student has studied the language with increased accountability for demonstration of development in the interpretive mode at the novice level and a systematic approach to accountability in all modes as the student progresses into the more advanced levels of instruction.

Because of the many layers of skills and proficiencies that are being acquired, and thus need to be assessed and evaluated, in our program assessments fall into two major categories:

Performance Assessment- is defined as how well a learner uses language acquired in a classroom setting

Proficiency Assessment- is defined as the spontaneous use of language in real-world situations that might occur when: interacting with native speakers of the language, or immersed in a target language environment.
