Brief Summary of Unit

Focus: "Knowing yourself is the beginning of all wisdom." *Aristotle*

This unit centers on the theme of self-identity. Students will focus on their own developing realities and identifying who they are through an assessment of family, friends, and environment. Larger questions about the mastery of self-awareness will be tackled by students through whole class works, differentiated texts, as well as independent choice reading. There will be an emphasis on introducing and mastering literary terms and figurative language. Students may complete multigenre projects or participate in collaborative literary circles that explore character motivation and development as well as self-expression. Personalized learning will allow for students to write and reflect on their own experiences as teenagers struggling to assess their own needs, desires, and truths.

This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship.

During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Revision Date: July 2023

Learning Plan

Instructional time for reading will be divided into thirds; one third of the time will be dedicated to whole class text instruction; one third will include literature circles; one third, independent reading. The intent is for student-readers to have clear modeling through whole-class instruction. These strategies are practiced through literature circles in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for the grade level; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text targets not only comprehension, but also analysis. Students will read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novels. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction may be chosen from the reading material and may be incorporated through targeted word study lessons.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through Sentence Study, holding students accountable for skills taught and practiced; modeling is done through mentor texts, both published and student-crafted. Students may complete analytical analysis, persuasive writing, synthesis essays, database research, narratives, and journal writing. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multimodal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important. Students will understand the stages of the writing process as they engage in different genres of writing, which may be modeled through the mentor texts studied in class. Ultimately, students will practice prewriting, drafting, revising, editing, and publishing to express themselves clearly and effectively.

Students will be taught how to speak and listen in addition to being assessed on these skills. Students will participate in individual, partner, and group activities including Literature Circles, Socratic Discussions,

Jigsaw Methods, and other Cooperative Learning activities.

Teachers may personalize instruction during this unit and address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students. Personalized Learning allows students to self-reflect and assess their own reading, writing, listening, viewing and speaking skills through the development of an electronic portfolio, journal writing, writer's notebook, independent reading, and/or book talks.

This unit of study focuses on an "Awareness of Self" and is centered on the quotation by Aristotle, "Knowing yourself is the beginning of all wisdom." This unit is designed to examine the different elements of one's own identity as well as how experiences and knowledge together develop a person's identity. The goal of the unit is for students to connect the major themes and ideas in these works to their contemporary world. Students will learn about discrimination and prejudices and their impact on a person's identity. As they read the whole class texts, they may also explore texts on their own based interested in certain topic.

For this particular unit, teachers should...

- Build a text set for discussion, writing, and synthesis
- Select common reading and literature circle texts
- Prepare for conferences with students
- Generate a list of skills students will master throughout the unit (focusing specifically on a few in each area)
- Create a summative assessment (backward design)
