Brief Summary of Unit

Focus: "Myths are the universal and timeless stories that reflect and shape our lives - they explore our desires, our fears, our longings, and provide narratives that remind us what it means to be human." Karen Armstrong, *A Short History of Myth*

The study of Greek, Roman, and Norse mythology develops students' cultural literacy by connecting them to the political, philosophical, and social roots of modern culture. Because the mythological stories serve as the inspiration for literature, art, and music, the study of ancient gods and myths will improve the students' ability to recognize and understand their references when they appear in modern culture. Additionally, students will understand that human beings are distinguished by their ability to ponder ideas that go beyond their everyday experiences.

This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship.

During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Standards

The identified standards reflect a developmental progression across grades/ levels and make interdisciplinary connections across content areas including social sciences, technology, career readiness, cultural awareness and global citizenship. The standards that follow are relevant to this course in addition to the associated content-based standards listed below.

Standard 9.4 Life Literacies and Key Skills: This standard outlines key literacies and technical skills such as critical thinking, global and cultural awareness, and technology literacy that are critical for students to develop

Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered three times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

The performance tasks listed below are examples of the types of assessments teachers may use in the classroom and the data collected by the district to track student progress.

Learning Plan

Instructional time for reading will be divided into thirds; one-third of the time will be dedicated to whole class text instruction; one-third will include literature circles; one-third, independent reading. The intent is for student-readers to have clear modeling through whole-class instruction. These strategies are practiced through literature circles in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for grade 9; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text during the ninth grade targets not only comprehension, but also analysis. Students will

read both long-and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novel. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modeling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Teachers may personalize instruction during this unit and address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students.

Students will be taught how to speak and listen in addition to being assessed on these skills.

This unit of study focuses on "The Gods, Myths, and Humankind" and is centered on the quotation by Karen Armstrong: "Myths are timeless and universal stories that reflect and shape our lives. They explore our desires, our fears, our longings, and provide narratives that remind us of what it means to be human." This unit is designed to examine how mythology informs both the ancient world and the modern world. We will discuss how ancient stories have modern relevance, and where we see recurring narratives in our modern-day lives and zeitgeist. The goal of the unit is for students to connect the major themes and ideas in these works to the contemporary world today. As students read whole class texts, they may also explore texts on their own based on their interests in certain topics.

For this particular unit, teachers should . . .

- Build a text set for discussion, writing, and synthesis
- Select common reading and literature circle texts
- Prepare for conferences with students
- Generate a list of skills students will master throughout the unit (focusing specifically on a few in each area)
- Create a summative assessment (backward design)
