

The Visual Literacy of Film: Tools to Establish Theme

Content Area: **English Language Arts**
Course(s):
Time Period: **Marking Period 1**
Length: **4-5 Weeks**
Status: **Published**

Brief Summary of Unit

In this unit, students will explore the importance of cinematography in film connecting it to the students' basic understanding of the plot, characters, and theme in the storyline. The cinematographer works closely with the director to manipulate content to achieve a specific purpose. Students will learn how cinematographers work with the director as a collaborative team to capture a film's overall mood and tone in the Mise-en-scene. This enables the director and cinematographer to read the thoughts and feelings of the characters visually and involves careful planning and analysis of how a frame will be shot and what colors will be emphasized. This unit focused not only on mise-en-scene (the framing of shots), color, and Film Noir but also on theme. Therefore, the overall goal of this unit is to teach students to analyze literature through film from the vantage point of the textual aspects of cinema. The unit tasks students to examine how the textual and technical expression of the film helps to further its theme.

Revised: July 2023

Standards

This unit further reflects the goals of the Holocaust Education mandate where students are able to identify and analyze applicable theories concerning human nature and behavior; understand that genocide is a consequence of prejudice and discrimination; understand that issues of moral dilemma and conscience have a profound impact on life; and understand the personal responsibility that each citizen bears to fight racism and hatred whenever and wherever it happens.

This unit challenges students to locate, evaluate, and use information effectively. Information literacy includes, but is not limited to, digital, visual, media, textual, and technological literacy. Lessons may include the research process and how information is created and produced; critical thinking and using information resources; research methods, including the difference between primary and secondary sources; the difference between facts, points of view, and opinions, accessing peer-reviewed print and digital library resources; the economic, legal, social, and ethical issues surrounding the use of information.

The identified standards reflect a developmental progression across grades/ levels and make interdisciplinary connections across content areas including social sciences, technology, career readiness, cultural awareness and global citizenship. The standards that follow are relevant to this course in addition to the associated content-based standards listed below.

Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered two times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

The performance tasks listed below are examples of the types of assessments teachers may use in the classroom and the data collected by the district to track student progress.

Formative:

- Teacher Observations
- Accountable Talk, Socratic Seminars/Fish Bowls
- Analysis of multimodal text sets
- Analysis of critical commentary, literary criticism
- Writers Notebook (quick writes/drafts/prewrites), emphasizing author's craft
- Close reading analysis of text using evidence as substantiation

Potential Analytical Researched Essay Assignment:

Topic: Light and Dark and Shadow of a Doubt --Theme and Tone

How do Welles, Coppola, Lumet, and Mulligan's stylized use of light and shadow express the theme of psychological doubt? Expressionist filmmakers are concerned with spiritual and psychological truths and use the camera as a means of commenting on their subject matter; they don't strive for realism, but rather present stylized images whose form is as important as their content. Most fiction films fall somewhere in between the two extremes of realism and formalism. It is your task in this paper to demonstrate the ways in which any or all of the director's use of light and shadow in their respective films further the film's psychological themes.

Learning Plan

The reading of text targets not only comprehension but also analysis. Students will read both long-and short-form, excerpted, and feature-length, fiction, and nonfiction texts. The study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, and graphic novels. Techniques and terminology specific to a genre of reading are examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modeling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to the product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Teachers may personalize instruction during this unit and address individual student's distinct learning needs, interests, aspirations, or cultural backgrounds.

Students may complete analytical analysis, persuasive writing, synthesis essays, database research, and journal writing. Students will participate in individual, partner, and group activities including Literature Circles, Socratic Discussions, Jigsaw Methods, and other Cooperative Learning activities.

Students will be taught how to speak and listen in addition to being assessed on these skills. Lessons will include identifying effective speaking and listening strategies, analyzing various techniques for enhancing voice and movement, modeling various effective speakers and listeners strategies, and creating opportunities to develop vocal effectiveness and presentation skills
