Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered two times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

The performance tasks listed below are examples of the types of assessments teachers may use in the classroom and the data collected by the district to track student progress.

Learning Plan

Instructional time for reading film will be divided into thirds; one-third of the time will be dedicated to whole class text instruction; one-third will include film circles; one-third, independent screenings. The intent is for student-readers to have clear modeling through whole-class instruction. These strategies are practiced through literature circles in a group setting of peers and through independent practice monitored through teacher conferencing with students. Materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of contemporary and canonical works.

The reading of text targets not only comprehension but also analysis. Students will read both long-and short-form, excerpted, and feature-length, fiction, and nonfiction texts. The study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, and graphic novels. Techniques and terminology specific to a genre of reading are examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction will be chosen from the reading material.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through mini-lessons, holding students accountable for skills taught and practiced; modeling is done through mentor texts, both published and student-crafted. Teachers focus on process in addition to the product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multi-modal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Teachers may personalize instruction during this unit and address individual student's distinct learning needs, interests, aspirations, or cultural backgrounds.

Students may complete analytical analysis, persuasive writing, synthesis essays, database research, and journal writing. Students will participate in individual, partner, and group activities including Literature Circles, Socratic Discussions, Jigsaw Methods, and other Cooperative Learning activities.

Students will be taught how to speak and listen in addition to being assessed on these skills. Lessons will include identifying effective speaking and listening strategies, analyzing various techniques for enhancing voice and movement, modeling various effective speakers and listeners strategies, and creating opportunities to develop vocal effectiveness and presentation skills
