Brief Summary of Unit

"The proper study of mankind is man." Alexander Pope

Students will explore the creation and emergence of subcultures and the role subcultures play in the evolution of mainstream culture. Nonfiction readings include but are not limited to excerpts from Ta-Nehisi Coates' *Between the World and Me* and articles from Bedford Spotlight Reader: American Subcultures. Students will also read short memoir excerpts, as well as poetry that reflects the experiences of members from different subcultures. Writing for the unit will focus on a research paper in which students choose a contemporary subculture and analyze the role it plays in mainstream culture, as well as on a short personal narrative.

This unit is designed to be part of a developmental progression across grade levels and make interdisciplinary connections across content areas including physical and social sciences, technology, career readiness, cultural awareness, and global citizenship. During this course, students are provided with opportunities to develop skills that pertain to a variety of careers. When completing this course, students can make informed choices and pursue electives that further their study and contribute toward the formation of career interest.

Standards

The identified standards reflect a developmental progression across grades/ levels and make interdisciplinary connections across content areas including social sciences, technology, career readiness, cultural awareness and global citizenship. The standards that follow are relevant to this course in addition to the associated content-based standards listed below.

This unit also reflects the goals of the Department of Education and the Amistad Commission including the infusion of the history of Africans and African-Americans into the curriculum in order to provide an accurate, complete, and inclusive history regarding the importance of African-Americans to the growth and

development of American society in a global context.

In accordance with New Jersey’s Chapter 32 Diversity and Inclusion Law, this unit includes instructional materials that highlight and promote diversity, including: economic diversity, equity, inclusion, tolerance, and belonging in connection with gender and sexual orientation and race and ethnicity.

This unit challenges students to locate, evaluate, and use information effectively. Information literacy includes, but is not limited to, digital, visual, media, textual, and technological literacy. Lessons may include the research process and how information is created and produced; critical thinking and using information resources; research methods, including the difference between primary and secondary sources; the difference between facts, points of view, and opinions, accessing peer-reviewed print and digital library resources; the economic, legal, social, and ethical issues surrounding the use of information.

Evidence/Performance Tasks

Developmental progression across years in both reading and writing is evidenced by multiple benchmark assessment screeners, administered two times per year. Follow up diagnostic assessments are used to target skill remediation. Student proficiency allows for additional or alternative assessment based on demonstration or absence of skill.

Students demonstrate differentiated proficiency through both formative and summative assessments in the classroom. Based on individual student readiness and performance, assessments can be implemented as formative and/or summative.

The performance tasks listed below are examples of the types of assessments teachers may use in the classroom and the data collected by the district to track student progress.

Formative:

- Teacher Observations

- Close reading analysis of text using evidence as substantiation
- Conferences: Individual and small group, accompanying conference notes
- Reflective exercises and assessments

Learning Plan

Instructional time for reading will be divided into thirds; one third of the time will be dedicated to whole class text instruction; one third will include literature circles; one third, independent reading. The intent is for student-readers to have clear modeling through whole-class instruction. These strategies are practiced through literature circles in a group setting of peers and through independent practice monitored through teacher conferencing with students. An emphasis will be based on the transfer of skills instruction, teaching the reader, not merely the content of the text. The text complexity and rigor of reading will be appropriate for the grade level; materials selection for whole-class and literature circles will be from the book list approved by the Board of Education. Classrooms will house rich and diverse independent reading libraries of both contemporary and canonical works.

The reading of text targets not only comprehension, but also analysis. Students will read both long-

and short-form, excerpted and full-length, print and electronic, fiction and nonfiction texts. Study will include the analysis of visual texts including film clips, art, infographic, maps, charts, graphs, cartoons, graphic novels. Technique and terminology specific to a genre of reading is examined. Research tasks are embedded throughout the year and a minimum of one task is completed during each unit. Vocabulary instruction may be chosen from the reading material and may be incorporated through targeted word study lessons.

Students write in all modes of rhetoric including narration/description, argument/persuasion, and exposition. Various forms of writing including digital writing are emphasized as well. Grammar instruction is embedded in writing instruction through Sentence Study, holding students accountable for skills taught and practiced; modeling is done through mentor texts, both published and student-crafted. Students may complete analytical analysis, persuasive writing, synthesis essays, database research, and journal writing. Teachers focus on process in addition to product with an emphasis on synthesizing texts with nuanced understanding; teacher-created multimodal text sets will be used as materials. High-and low-stakes, timed and untimed pieces are all important.

Students will be taught how to speak and listen in addition to being assessed on these skills. Students will participate in individual, partner and group activities including Literature Circles, Socratic Discussions, Jigsaw Methods, and other Cooperative Learning activities.

Teachers may personalize instruction during this unit and address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students. Personalized Learning allows students to self-reflect and assess their own reading, writing, listening, viewing and speaking skills through the development of an electronic portfolio, journal writing, writer's notebook, independent reading, and/or book talks.

This unit of study focuses on American subcultures that emerge during turbulent times and is centered on the quotation by Alexander Pope: "The proper study of mankind is man." This unit is designed to examine the creation of marginalized groups and the emergence of subcultures, as well as the roles they play both in response to as well as in the evolution of larger, mass culture. Students will read a wide range of articles that analyze the relationship between mainstream American culture and various subcultures. Although many of the texts will be nonfiction, there will also be an emphasis on poetry, as students will read a variety of short memoir and poetry that explore author's personal experiences. The goal of the unit is for students to connect the major themes and ideas in these works to the contemporary world today. After students read whole class texts, they will be asked to explore their interest in a particular contemporary subculture by researching and analyzing it. The unit will culminate with students writing a short personal narrative that places them inside a small group or subculture of their interests.

For this particular unit, teachers should . . .

- Build a text set for discussion, writing, and synthesis

- Select common reading and literature circle texts
- Prepare for conferences with students
- Generate a list of skills students will master throughout the unit (focusing specifically on a few in each area)
- Create a summative assessment (backward design)
