

2024-2025 G&T Grade 5 Unit 2 Literacy World Travel

Content Area: **Gifted and Talented**
Course(s):
Time Period: **Full Year**
Length: **8 Weeks**
Status: **Published**

5th Language Arts - World Culture - World Travel

Unit Rationale

The focus of Unit 1 is to expand 5th grade G&T students' knowledge and understanding of world travel and tourism. The goal is for students to learn about places to experience other than local beaches, cities, and Disney World. In previous grades, G&T students have explored holidays, homes, and music. Building upon that knowledge, this unit will focus on popular tourist designation and the process of planning an international trip. Students will choose a country and city to visit, then look into flights, hotels, the climate, the language, the culture, and sights to see. Students will also need to determine the cost along with taking into account the local currency. Students will create a culminating presentation to share this info and their planned vacation with their peers. This world culture unit encourages acceptance, inclusivity, and cultural awareness.

Modifications and/or Accommodations

Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)

English Language Learners

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

Front-Loading Vocabulary: The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

Special Education Students

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Oral Reading: The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

Timers: The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

Students with 504 Plans

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Gifted & Talented Strategies

Extensions/Enrichments: Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply

acquired knowledge, and/or to produce something in reference to acquired knowledge.

Modify/Change Activities: Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

Students at Risk of School Failure

Directions or Instructions: Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

Peer Support: Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

Alternate or Modified Assignments: Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

Increase One to One Time: When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

Contracts: It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

Hands On: As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

Tests/Assessments: Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

Seating: Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.

Integration of Diversity, Equity and Inclusion; Climate Change; Informational and Media Literacy

This unit explores music around the world, a natural opportunity to explore a diverse array of cultures.

TECH.9.4.5.IML	Information and Media Literacy
	Collaboration with individuals with diverse perspectives can result in new ways of thinking and/or innovative solutions.
	Culture and geography can shape an individual's experiences and perspectives.
	Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills.

Collaborating digitally as a team can often develop a better artifact than an individual working alone.

The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.

Accurate and comprehensive information comes in a variety of platforms and formats and is the basis for effective decision-making.

Integration of Computer Science and Design Thinking

CS.3-5.8.1.5.AP.1	Compare and refine multiple algorithms for the same task and determine which is the most appropriate.
CS.3-5.8.1.5.AP.6	Develop programs using an iterative process, implement the program design, and test the program to ensure it works as intended.
CS.3-5.8.1.5.DA.1	Collect, organize, and display data in order to highlight relationships or support a claim.
CS.3-5.8.1.5.DA.3	Organize and present collected data visually to communicate insights gained from different views of the data.
CS.3-5.8.1.5.DA.4	Organize and present climate change data visually to highlight relationships or support a claim.
CS.3-5.DA	<p>Data & Analysis</p> <p>Different algorithms can achieve the same result. Some algorithms are more appropriate for a specific use than others.</p> <p>Individuals develop programs using an iterative process involving design, implementation, testing, and review.</p> <p>Data can be organized, displayed, and presented to highlight relationships.</p> <p>Individuals can select, organize, and transform data into different visual representations and communicate insights gained from the data.</p>

Interdisciplinary Connections: NJSL for ELA, Social Studies, Science and/or Math

ELA.K-12.4	Building Knowledge: Building strong content knowledge and connecting ideas across disciplines using a variety of text resources and media.
ELA.K-12.5	Leveraging Technology: Employing technology and digital media thoughtfully, strategically and capably to enhance reading, writing, speaking, listening, and language use.
ELA.K-12.6	Understanding Self and Others: Using literacy as a vehicle to affirm all the aspects of one's own identity, as well as understand, connect to and respect other perspectives and cultures. Regions form and change as a result of unique physical conditions, economies, and cultures.
ELA.W.IW.5.2	Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
ELA.W.IW.5.2.A	Introduce a topic clearly to provide a focus and group related information logically; include text features such as headings, illustrations, and multimedia when useful to aid in comprehension.
ELA.W.IW.5.2.B	Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.

ELA.W.IW.5.2.C	Link ideas within paragraphs and sections of information using words, phrases, and clauses (e.g., in contrast, especially).
ELA.W.IW.5.2.D	Use precise language and domain-specific vocabulary to inform about or explain the topic.
ELA.W.IW.5.2.E	Provide a conclusion related to the information of explanation presented.
ELA.W.IW.4.2	Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
ELA.W.IW.4.2.A	Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), text features (e.g., illustrations, diagrams, captions) and multimedia when useful to aid in comprehension.
ELA.W.IW.4.2.D	Use precise language and domain-specific vocabulary to inform about or explain the topic.
ELA.W.IW.4.2.E	Provide a conclusion related to the information or explanation presented.
	Geography, People, and the Environment: Global Interconnections
	Interactions between humans has led to the spread of cultural practices, artifacts, languages, diseases, and other attributes as well as changes in environmental characteristics.
SOC.6.1.5.GeoGI.1	Use multiple sources to evaluate the impact of the movement of people from place to place on individuals, communities, and regions.
SOC.6.1.5.GeoGI.4	Explain how cultural and environmental characteristics affect the distribution and movement of people, goods, and ideas.
ELA.W.WR.4.5	Conduct short research projects that use multiple reference sources (print and non-print) and build knowledge through investigation of different aspects of a topic.
ELA.SL.PE.4.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts, building on others' ideas and expressing their own clearly.
ELA.SL.AS.4.6	Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation.
SOC.6.1.5.EconGE.1	Explain how the development of communication systems has led to increased collaboration and the spread of ideas throughout the United States and the world.
SOC.6.1.5.EconGE.4	Compare and contrast how the availability of resources affects people across the world differently.
