

# 2024-2025 G&T Grade 5 Unit 1 Math Stock Market

Content Area: **Gifted and Talented**  
Course(s):  
Time Period: **Full Year**  
Length: **8 Weeks**  
Status: **Published**

## **5th Language Arts - World Culture - World Travel**

---

### Unit Rationale

The focus of Unit 1 is to expand 5th grade G&T students' knowledge and understanding of world travel and tourism. The goal is for students to learn about places to experience other than local beaches, cities, and Disney World. In previous grades, G&T students have explored holidays, homes, and music. Building upon that knowledge, this unit will focus on popular tourist designation and the process of planning an international trip. Students will choose a country and city to visit, then look into flights, hotels, the climate, the language, the culture, and sights to see. Students will also need to determine the cost along with taking into account the local currency. Students will create a culminating presentation to share this info and their planned vacation with their peers. This world culture unit encourages acceptance, inclusivity, and cultural awareness.

### **SEL Competencies**

---

|               |                                                                                                              |
|---------------|--------------------------------------------------------------------------------------------------------------|
| SEL.PK-12.1   | Self-Awareness                                                                                               |
| SEL.PK-12.1.1 | Recognize one's feelings and thoughts                                                                        |
| SEL.PK-12.1.2 | Recognize the impact of one's feelings and thoughts on one's own behavior                                    |
| SEL.PK-12.1.3 | Recognize one's personal traits, strengths, and limitations                                                  |
| SEL.PK-12.1.4 | Recognize the importance of self-confidence in handling daily tasks and challenges                           |
| SEL.PK-12.2   | Self-Management                                                                                              |
| SEL.PK-12.2.1 | Understand and practice strategies for managing one's own emotions, thoughts, and behaviors                  |
| SEL.PK-12.2.2 | Recognize the skills needed to establish and achieve personal and educational goals                          |
| SEL.PK-12.2.3 | Identify and apply ways to persevere or overcome barriers through alternative methods to achieve one's goals |
| SEL.PK-12.3   | Social Awareness                                                                                             |
| SEL.PK-12.3.1 | Recognize and identify the thoughts, feelings, and perspectives of others                                    |
| SEL.PK-12.3.2 | Demonstrate and awareness of the differences among individuals, groups, and others' cultural backgrounds     |
| SEL.PK-12.3.3 | Demonstrate an understanding of the need for mutual respect when viewpoints differ                           |
| SEL.PK-12.3.4 | Demonstrate an awareness of the expectations for social interactions in a variety of settings                |
| SEL.PK-12.4   | Responsible Decision-Making                                                                                  |

|               |                                                                                               |
|---------------|-----------------------------------------------------------------------------------------------|
| SEL.PK-12.4.1 | Develop, implement and model effective problem-solving, and critical thinking skills          |
| SEL.PK-12.4.2 | Identify the consequences associated with one's actions in order to make constructive choices |
| SEL.PK-12.4.3 | Evaluate personal, ethical, safety, and civic impact of decisions                             |
| SEL.PK-12.5   | Relationship Skills                                                                           |
| SEL.PK-12.5.1 | Establish and maintain healthy relationships                                                  |
| SEL.PK-12.5.2 | Utilize positive communication and social skills to interact effectively with others          |
| SEL.PK-12.5.3 | Identify ways to resist inappropriate social pressure                                         |
| SEL.PK-12.5.4 | Demonstrate the ability to prevent and resolve interpersonal conflicts in constructive ways   |
| SEL.PK-12.5.5 | Identify who, when, where, or how to seek help for oneself or others when needed              |

## **21st Century Life and Career, G&T Standards**

---

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CRP.K-12.CRP1    | Act as a responsible and contributing citizen and employee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| CRP.K-12.CRP1.1  | Career-ready individuals understand the obligations and responsibilities of being a member of a community, and they demonstrate this understanding every day through their interactions with others. They are conscientious of the impacts of their decisions on others and the environment around them. They think about the near-term and long-term consequences of their actions and seek to act in ways that contribute to the betterment of their teams, families, community and workplace. They are reliable and consistent in going beyond the minimum expectation and in participating in activities that serve the greater good. |
| CRP.K-12.CRP2    | Apply appropriate academic and technical skills.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| CRP.K-12.CRP2.1  | Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.                                                                                                                                                                                                                                                                                       |
| CRP.K-12.CRP4    | Communicate clearly and effectively and with reason.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| CRP.K-12.CRP6    | Demonstrate creativity and innovation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| CRP.K-12.CRP6.1  | Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.                                          |
| CRP.K-12.CRP7    | Employ valid and reliable research strategies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| CRP.K-12.CRP7.1  | Career-ready individuals are discerning in accepting and using new information to make decisions, change practices or inform strategies. They use reliable research process to search for new information. They evaluate the validity of sources when considering the use and adoption of external information or practices in their workplace situation.                                                                                                                                                                                                                                                                                 |
| CRP.K-12.CRP9    | Model integrity, ethical leadership and effective management.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| CRP.K-12.CRP11   | Use technology to enhance productivity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| CRP.K-12.CRP11.1 | Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring new technology. They are proficient with ubiquitous technology applications. They understand the inherent risks-personal and organizational-of                                                                                                                                                                                                                                                                                     |

|                  |                                                                                                                                                                                                                                                                                                                                      |

| GIFT.PK-12.1     | Learning and Development                                                                                                                                                                                                                                                                                                             |
| GIFT.PK-12.1.1   | Self-Understanding. Students with gifts and talents demonstrate self-knowledge with respect to their interests, strengths, identities, and needs in socio-emotional development and in intellectual, academic, creative, leadership, and artistic domains.                                                                           |
| GIFT.PK-12.1.1.1 | Educators engage students with gifts and talents in identifying interests, strengths, and gifts.                                                                                                                                                                                                                                     |
| GIFT.PK-12.1.1.2 | Educators assist students with gifts and talents in developing identities supportive of achievement.                                                                                                                                                                                                                                 |
| GIFT.PK-12.1.2   | Self-Understanding. Students with gifts and talents possess a developmentally appropriate understanding of how they learn and grow; they recognize the influences of their beliefs, traditions, and values on their learning and behavior.                                                                                           |
| GIFT.PK-12.1.2.1 | Educators develop activities that match each student’s developmental level and culture-based learning needs.                                                                                                                                                                                                                         |
| GIFT.PK-12.1.3   | Self-Understanding. Students with gifts and talents demonstrate understanding of and respect for similarities and differences between themselves and their peer group and others in the general population.                                                                                                                          |

## **Essential Questions**

---

How could learning about travel outside of the United States expand your world view?

Why are certain travel destinations very popular?

How could the culture of an area impact travel plans?

What are the most important things to consider when planning an international trip?

## **Instructional Plan**

---

## **1 Where in the world? Geography Intro**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to identify the continents.

We are learning to identify and locate different countries.

We are learning to identify famous places around the world.

We are learning about different cultures.

### **Student Success Criteria ... “I can statements”**

I can find and label continents on the map.

I can name some countries in each continent.

I can name some famous places in each continent.

I can share information about different cultures around the world.

### **Instructional Strategies and Activities**

1. Introduce a map/globe
2. Whole class World KWL. Continents? Countries? Cities? Famous places? Languages? Climate?
3. Show and discuss [Brain Pop Continents Movie](#)
4. Student map exploration and discussion. Where are you from? Where are your ancestors from? Where have you been? Where do you want to go?
5. Group Activity. Complete the [Geography Challenge](#).
6. Discuss and Score.
7. Complete KWL
8. Reflect

## **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Completed or attempted Geography Challenge
- 6) Exit Ticket

## **Instructional Materials and Resources**

## **Reflections and Suggested Modifications**

## **2 World Travel Exploration**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning about different countries and cultures.

We are learning about popular tourist destinations.

### **Student Success Criteria ... "I can statements"**

I can find continents and countries on a map.

I can explore tourist destinations from different countries and cultures.

I can notice similarities and differences in tourist destinations around the world.

## **Instructional Strategies and Activities**

1. Review map/globe. Countries and Continents.
2. Whole class- begin music around the world KWL or Schema Map.
3. Introduce and explore [top tourist destinations](#) and [50 Bucket List travel destinations](#).
4. Research and discuss favorite places. Begin a list.
5. Pros and Cons. Compare and Contrast discussion.
6. Complete KWL or Schema Map.
7. Reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Completed KWL or other knowledge-collecting activity
- 6) Exit Ticket

## Reflections and Suggested Modifications

### **3 World Travel Exploration II- Choose a Destination**

---

#### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning about different countries and cultures.

We are learning about popular tourist destinations.

We are weighing the pros and cons of different travel destinations.

#### **Student Success Criteria ... “I can statements”**

I can find continents and countries on a map.

I can explore tourist destinations from different countries and cultures.

I can notice similarities and differences in tourist destinations around the world.

I can choose a travel destination to research.

#### **Instructional Strategies and Activities**

1. Review map/globe. Countries and Continents.
2. Whole class- begin music around the world KWL or Schema Map.
3. Introduce and explore [top tourist destinations](#) and [50 Bucket List travel destinations](#).
4. Research and discuss favorite places. Begin a list.
5. Pros and Cons. Compare and Contrast discussion.
6. Choose a travel destination for the project.
7. Reflect.

## **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Completed KWL or other knowledge-collecting activity
- 6) Exit Ticket

### **4 Research The Geography and Culture**

---

#### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning about different countries and cultures.

We are learning about popular tourist destinations.

We are weighing the pros and cons of different travel destinations.

## **Student Success Criteria ... “I can statements”**

I can find continents and countries on a map.

I can explore tourist destinations from different countries and cultures.

I can notice similarities and differences in tourist destinations around the world.

I can choose a travel destination to research.

I can research an area's location, climate, money, and other aspects.

## **Instructional Strategies and Activities**

1. Introduce sites for research. Model researching the location, climate, money, etc. of an area.
2. Model note-taking and filling out the research packet.
3. Research independently and/or collaboratively.
4. Discuss. Share.
5. Reflect.

## **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Research Packet
- 6) Exit Ticket

## **7 Presentation Creation**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning about different countries and cultures.

We are learning about popular tourist destinations.

We are weighing the pros and cons of different travel destinations.

We are learning to create a presentation about a travel destination.

### **Student Success Criteria ... "I can statements"**

I can find continents and countries on a map.

I can explore tourist destinations from different countries and cultures.

I can notice similarities and differences in tourist destinations around the world.

I can choose a travel destination to research.

I can research an area's location, climate, money, and other aspects.

I can research famous and important tourist destinations.

I can use travel sites to research flights and hotels.

I can take notes and fill out my research packet.

I can create a presentation about my chosen travel destination.

### **Instructional Strategies and Activities**

1. Immerse students in sample projects from previous years.
2. Introduce and model the chosen multimedia platform for their presentations.
3. Discuss and Q&A.
4. Students work independently or collaboratively to create their presentations.
5. Discuss. Share.
6. Reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Research Packet
6. Presentation
- 7) Exit Ticket

## **Reflections and Suggested Modifications**

### **9 Class Presentation**

---

#### **Student Learning Intentions or We are learning to ... (WALT)**

- 1) WALT create a presentation about our trip to a travel destination.
- 2) WALT present to the class, teaching our peers about our chosen travel destination.

#### **Student Success Criteria ...**

I can present my project to my classmates.

I can speak loudly and clearly.

I can respectfully respond to questions after the presentation.

#### **Instructional Strategies and Activities**

- 1) Teacher model rules and expectations for giving a presentation
- 2) Students present Slides/Sites/WeVideo to classmates
- 3) Q&A with class
- 4) Discuss
- 5) Reflect

#### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment

5) Completed Presentation

6) Exit Ticket

### **Instructional Materials and Resources**

### **Reflections and Suggested Modifications**

### **Pre-Assessments**

---

5th Second Marking Period: Reading and Literacy G&T Requirements

- Instructional Level U from the 1st Interval November-December of the Fountas & Pinnell Instructional Level Expectations for Reading (Exceeds Expectations)
- Earn an E in Reading, Writing, and Word Study on their most recent report card.

### **Modifications and/or Accommodations**

---

#### **Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)**

#### **English Language Learners**

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

**Front-Loading Vocabulary:** The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

## **Special Education Students**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

**Oral Reading:** The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

**Timers:** The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

## **Students with 504 Plans**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

## **Gifted & Talented Strategies**

**Extensions/Enrichments:** Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply

acquired knowledge, and/or to produce something in reference to acquired knowledge.

**Modify/Change Activities:** Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

## Students at Risk of School Failure

**Directions or Instructions:** Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

**Peer Support:** Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

**Alternate or Modified Assignments:** Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

**Increase One to One Time:** When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

**Contracts:** It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

**Hands On:** As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

**Tests/Assessments:** Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

**Seating:** Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.

## **Integration of Diversity, Equity and Inclusion; Climate Change; Informational and Media Literacy**

---

This unit explores music around the world, a natural opportunity to explore a diverse array of cultures.

See Crosswalks.

### **New Jersey Student Learning Standards: Content Area**

---

|                | Sentence Composition (Grammar, Syntax, and Punctuation)                                                                                                                                             |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ELA.L.WF.5.2   | Demonstrate command of the conventions of writing, including those listed under grade four foundational skills.                                                                                     |
| ELA.L.KL.5.1   | Use knowledge of language and its conventions when writing, speaking, reading, or listening.                                                                                                        |
| ELA.L.KL.5.1.A | Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases.                                                                                                |
| ELA.L.VL.5.2.C | Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases. |
| ELA.RI.CR.5.1  | Quote accurately from an informational text when explaining what the text says explicitly and make relevant connections when drawing inferences from the text.                                      |
| ELA.RI.CI.5.2  | Determine the central idea of an informational text and explain how it is supported by key details; summarize the text.                                                                             |
| ELA.RI.TS.5.4  | Compare and contrast the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in two or more texts.                          |
| ELA.W.IW.5.2   | Write informative/explanatory texts to examine a topic and convey ideas and information clearly.                                                                                                    |
| ELA.W.IW.5.2.A | Introduce a topic clearly to provide a focus and group related information logically; include text features such as headings, illustrations, and multimedia when useful to aid in comprehension.    |
| ELA.W.IW.5.2.B | Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.                                                                    |
| ELA.W.IW.5.2.C | Link ideas within paragraphs and sections of information using words, phrases, and clauses (e.g., in contrast, especially).                                                                         |
| ELA.W.IW.5.2.D | Use precise language and domain-specific vocabulary to inform about or explain the topic.                                                                                                           |
| ELA.W.IW.5.2.E | Provide a conclusion related to the information of explanation presented.                                                                                                                           |
| ELA.W.WP.5.4   | With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.                                      |

|                 |                                                                                                                                                                                                                                                               |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ELA.W.WP.5.4.A  | Consider audience, purpose, and intent before writing.                                                                                                                                                                                                        |
| ELA.W.WP.5.4.B  | Plan appropriately to use specialized, topic-specific language appropriate for the audience, purpose and subject matter.                                                                                                                                      |
| ELA.W.WP.5.4.C  | Consider writing as a process, including self-evaluation, revision and editing.                                                                                                                                                                               |
| ELA.W.WP.5.4.D  | With adult and peer feedback, and digital or print tools such as a dictionary, thesaurus, and/or spell checker, evaluate whether the writing achieved its goal and make changes in content or form as necessary.                                              |
| ELA.W.SE.5.6    | Gather relevant information from multiple valid and reliable print and digital sources; summarize or paraphrase information in notes and finished work, making note of any similarities and differences among ideas presented; and provide a list of sources. |
| ELA.W.RW.5.7    | Write routinely over extended time frames (time for research and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.                                                                          |
| ELA.SL          | Speaking and Listening                                                                                                                                                                                                                                        |
| ELA.SL.PE.5.1   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.                                            |
| ELA.SL.PE.5.1.A | Explicitly draw on previously read text or material and other information known about the topic to explore ideas under discussion.                                                                                                                            |
| ELA.SL.PI.5.4   | Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.                                           |
| ELA.SL.UM.5.5   | Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.                                                                                               |
| ELA.SL.AS.5.6   | Adapt speech to a variety of contexts and tasks, using formal English when appropriate to task and situation.                                                                                                                                                 |

## **Integration of Career Readiness. Life Literacies and Key Skills**

---

|                 |                                                                                                                                                                                                                                       |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TECH.9.4.5.CI   | Creativity and Innovation                                                                                                                                                                                                             |
| TECH.9.4.5.CI.1 | Use appropriate communication technologies to collaborate with individuals with diverse perspectives about a local and/or global climate change issue and deliberate about possible solutions (e.g., W.4.6, 3.MD.B.3,7.1.NM.IPERS.6). |
| TECH.9.4.5.CI.3 | Participate in a brainstorming session with individuals with diverse perspectives to expand one's thinking about a topic of curiosity (e.g., 8.2.5.ED.2, 1.5.5.CR1a).                                                                 |
| TECH.9.4.5.CI.4 | Research the development process of a product and identify the role of failure as a part of the creative process (e.g., W.4.7, 8.2.5.ED.6).                                                                                           |
| TECH.9.4.5.TL   | Technology Literacy                                                                                                                                                                                                                   |
| TECH.9.4.5.TL.4 | Compare and contrast artifacts produced individually to those developed collaboratively (e.g., 1.5.5.CR3a).                                                                                                                           |
| TECH.9.4.5.GCA  | Global and Cultural Awareness                                                                                                                                                                                                         |
| TECH.9.4.5.IML  | Information and Media Literacy                                                                                                                                                                                                        |
|                 | Collaboration with individuals with diverse perspectives can result in new ways of thinking and/or innovative solutions.                                                                                                              |
|                 | Culture and geography can shape an individual's experiences and perspectives.                                                                                                                                                         |
|                 | Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills.                                                                                           |

Collaborating digitally as a team can often develop a better artifact than an individual working alone.

The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.

Accurate and comprehensive information comes in a variety of platforms and formats and is the basis for effective decision-making.

## **Integration of Computer Science and Design Thinking**

---

|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CS.3-5.8.1.5.AP.1 | Compare and refine multiple algorithms for the same task and determine which is the most appropriate.                                                                                                                                                                                                                                                                                                                                                                                                              |
| CS.3-5.8.1.5.AP.6 | Develop programs using an iterative process, implement the program design, and test the program to ensure it works as intended.                                                                                                                                                                                                                                                                                                                                                                                    |
| CS.3-5.8.1.5.DA.1 | Collect, organize, and display data in order to highlight relationships or support a claim.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| CS.3-5.8.1.5.DA.3 | Organize and present collected data visually to communicate insights gained from different views of the data.                                                                                                                                                                                                                                                                                                                                                                                                      |
| CS.3-5.8.1.5.DA.4 | Organize and present climate change data visually to highlight relationships or support a claim.                                                                                                                                                                                                                                                                                                                                                                                                                   |
| CS.3-5.DA         | <p>Data &amp; Analysis</p> <p>Different algorithms can achieve the same result. Some algorithms are more appropriate for a specific use than others.</p> <p>Individuals develop programs using an iterative process involving design, implementation, testing, and review.</p> <p>Data can be organized, displayed, and presented to highlight relationships.</p> <p>Individuals can select, organize, and transform data into different visual representations and communicate insights gained from the data.</p> |

## **Interdisciplinary Connections: NJSL for ELA, Social Studies, Science and/or Math**

---

|                |                                                                                                                                                                                                                                                                                               |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ELA.K-12.4     | Building Knowledge: Building strong content knowledge and connecting ideas across disciplines using a variety of text resources and media.                                                                                                                                                    |
| ELA.K-12.5     | Leveraging Technology: Employing technology and digital media thoughtfully, strategically and capably to enhance reading, writing, speaking, listening, and language use.                                                                                                                     |
| ELA.K-12.6     | Understanding Self and Others: Using literacy as a vehicle to affirm all the aspects of one's own identity, as well as understand, connect to and respect other perspectives and cultures.<br><br>Regions form and change as a result of unique physical conditions, economies, and cultures. |
| ELA.W.IW.5.2   | Write informative/explanatory texts to examine a topic and convey ideas and information clearly.                                                                                                                                                                                              |
| ELA.W.IW.5.2.A | Introduce a topic clearly to provide a focus and group related information logically; include text features such as headings, illustrations, and multimedia when useful to aid in comprehension.                                                                                              |
| ELA.W.IW.5.2.B | Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.                                                                                                                                                              |

|                    |                                                                                                                                                                                                                                        |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ELA.W.IW.5.2.C     | Link ideas within paragraphs and sections of information using words, phrases, and clauses (e.g., in contrast, especially).                                                                                                            |
| ELA.W.IW.5.2.D     | Use precise language and domain-specific vocabulary to inform about or explain the topic.                                                                                                                                              |
| ELA.W.IW.5.2.E     | Provide a conclusion related to the information of explanation presented.                                                                                                                                                              |
| ELA.W.IW.4.2       | Write informative/explanatory texts to examine a topic and convey ideas and information clearly.                                                                                                                                       |
| ELA.W.IW.4.2.A     | Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), text features (e.g., illustrations, diagrams, captions) and multimedia when useful to aid in comprehension.   |
| ELA.W.IW.4.2.D     | Use precise language and domain-specific vocabulary to inform about or explain the topic.                                                                                                                                              |
| ELA.W.IW.4.2.E     | Provide a conclusion related to the information or explanation presented.                                                                                                                                                              |
|                    | Geography, People, and the Environment: Global Interconnections                                                                                                                                                                        |
|                    | Interactions between humans has led to the spread of cultural practices, artifacts, languages, diseases, and other attributes as well as changes in environmental characteristics.                                                     |
| SOC.6.1.5.GeoGI.1  | Use multiple sources to evaluate the impact of the movement of people from place to place on individuals, communities, and regions.                                                                                                    |
| SOC.6.1.5.GeoGI.4  | Explain how cultural and environmental characteristics affect the distribution and movement of people, goods, and ideas.                                                                                                               |
| ELA.W.WR.4.5       | Conduct short research projects that use multiple reference sources (print and non-print) and build knowledge through investigation of different aspects of a topic.                                                                   |
| ELA.SL.PE.4.1      | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts, building on others' ideas and expressing their own clearly.                     |
| ELA.SL.AS.4.6      | Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation. |
| SOC.6.1.5.EconGE.1 | Explain how the development of communication systems has led to increased collaboration and the spread of ideas throughout the United States and the world.                                                                            |
| SOC.6.1.5.EconGE.4 | Compare and contrast how the availability of resources affects people across the world differently.                                                                                                                                    |

## **5th Science - STEM**

### **Unit Rationale**

This unit allows students to grow and utilize their STEM skills. STEM teaches critical thinking and innovation. This hands-on and collaborative unit focuses on logical thinking and problem-solving. This helps students develop habits that will allow them to succeed in any field. The design process in STEM, or the engineering design process, is a structured framework that helps people solve problems using science, technology, engineering, and math (STEM) knowledge. STEM projects challenge students to be creative and develop their own solutions. STEM promotes critical thinking, curiosity, persistence, decision-making, leadership, entrepreneurship, and acceptance of failure.

## **SEL Competencies**

---

|               |                                                                                                      |
|---------------|------------------------------------------------------------------------------------------------------|
| SEL.PK-12.1   | Self-Awareness                                                                                       |
| SEL.PK-12.1.1 | Recognize one's feelings and thoughts                                                                |
| SEL.PK-12.1.2 | Recognize the impact of one's feelings and thoughts on one's own behavior                            |
| SEL.PK-12.1.3 | Recognize one's personal traits, strengths, and limitations                                          |
| SEL.PK-12.1.4 | Recognize the importance of self-confidence in handling daily tasks and challenges                   |
| SEL.PK-12.2   | Self-Management                                                                                      |
| SEL.PK-12.2.1 | Understand and practice strategies for managing one's own emotions, thoughts, and behaviors          |
| SEL.PK-12.2.2 | Recognize the skills needed to establish and achieve personal and educational goals                  |
| SEL.PK-12.3   | Social Awareness                                                                                     |
| SEL.PK-12.3.1 | Recognize and identify the thoughts, feelings, and perspectives of others                            |
| SEL.PK-12.3.2 | Demonstrate awareness of the differences among individuals, groups, and others' cultural backgrounds |
| SEL.PK-12.3.4 | Demonstrate an awareness of the expectations for social interactions in a variety of settings        |
| SEL.PK-12.4   | Responsible Decision-Making                                                                          |
| SEL.PK-12.4.1 | Develop, implement and model effective problem-solving, and critical thinking skills                 |
| SEL.PK-12.4.2 | Identify the consequences associated with one's actions in order to make constructive choices        |
| SEL.PK-12.4.3 | Evaluate personal, ethical, safety, and civic impact of decisions                                    |
| SEL.PK-12.5   | Relationship Skills                                                                                  |
| SEL.PK-12.5.1 | Establish and maintain healthy relationships                                                         |
| SEL.PK-12.5.2 | Utilize positive communication and social skills to interact effectively with others                 |
| SEL.PK-12.5.3 | Identify ways to resist inappropriate social pressure                                                |
| SEL.PK-12.5.4 | Demonstrate the ability to prevent and resolve interpersonal conflicts in constructive ways          |
| SEL.PK-12.5.5 | Identify who, when, where, or how to seek help for oneself or others when needed                     |

| CRP.K-12.CRP1   | Act as a responsible and contributing citizen and employee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| CRP.K-12.CRP1.1 | Career-ready individuals understand the obligations and responsibilities of being a member of a community, and they demonstrate this understanding every day through their interactions with others. They are conscientious of the impacts of their decisions on others and the environment around them. They think about the near-term and long-term consequences of their actions and seek to act in ways that contribute to the betterment of their teams, families, community and workplace. They are reliable and consistent in going beyond the minimum expectation and in participating in activities that serve the greater good. |
| CRP.K-12.CRP2   | Apply appropriate academic and technical skills.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CRP.K-12.CRP2.1  | Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.                                                                                                                                                                                                                                                                                                          |
| CRP.K-12.CRP3.1  | Career-ready individuals understand the relationship between personal health, workplace performance and personal well-being; they act on that understanding to regularly practice healthy diet, exercise and mental health activities. Career-ready individuals also take regular action to contribute to their personal financial well-being, understanding that personal financial security provides the peace of mind required to contribute more fully to their own career success.                                                                                                                                                                      |
| CRP.K-12.CRP4    | Communicate clearly and effectively and with reason.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| CRP.K-12.CRP4.1  | Career-ready individuals communicate thoughts, ideas, and action plans with clarity, whether using written, verbal, and/or visual methods. They communicate in the workplace with clarity and purpose to make maximum use of their own and others' time. They are excellent writers; they master conventions, word choice, and organization, and use effective tone and presentation skills to articulate ideas. They are skilled at interacting with others; they are active listeners and speak clearly and with purpose. Career-ready individuals think about the audience for their communication and prepare accordingly to ensure the desired outcome. |
| CRP.K-12.CRP6    | Demonstrate creativity and innovation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| CRP.K-12.CRP6.1  | Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.                                                             |
| CRP.K-12.CRP8    | Utilize critical thinking to make sense of problems and persevere in solving them.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| CRP.K-12.CRP8.1  | Career-ready individuals readily recognize problems in the workplace, understand the nature of the problem, and devise effective plans to solve the problem. They are aware of problems when they occur and take action quickly to address the problem; they thoughtfully investigate the root cause of the problem prior to introducing solutions. They carefully consider the options to solve the problem. Once a solution is agreed upon, they follow through to ensure the problem is solved, whether through their own actions or the actions of others.                                                                                               |
| CRP.K-12.CRP11   | Use technology to enhance productivity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| CRP.K-12.CRP11.1 | Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring new technology. They are proficient with ubiquitous technology applications. They understand the inherent risks-personal and organizational-of technology applications, and they take actions to prevent or mitigate these risks.                                                                                                                                                                                                                     |
| CRP.K-12.CRP12   | Work productively in teams while using cultural global competence.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| CRP.K-12.CRP12.1 | Career-ready individuals positively contribute to every team, whether formal or informal. They apply an awareness of cultural difference to avoid barriers to productive and positive interaction. They find ways to increase the engagement and contribution of all team members. They plan and facilitate effective team meetings.                                                                                                                                                                                                                                                                                                                         |
| GIFT.PK-12.1.1   | Self-Understanding. Students with gifts and talents demonstrate self-knowledge with respect to their interests, strengths, identities, and needs in socio-emotional development and in intellectual, academic, creative, leadership, and artistic domains.                                                                                                                                                                                                                                                                                                                                                                                                   |
| GIFT.PK-12.1.1.1 | Educators engage students with gifts and talents in identifying interests, strengths, and gifts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                  |                                                                                                                                                                                                                                                                                                                                      |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| GIFT.PK-12.1.1.2 | Educators assist students with gifts and talents in developing identities supportive of achievement.                                                                                                                                                                                                                                 |
| GIFT.PK-12.1.2   | Self-Understanding. Students with gifts and talents possess a developmentally appropriate understanding of how they learn and grow; they recognize the influences of their beliefs, traditions, and values on their learning and behavior.                                                                                           |
| GIFT.PK-12.1.2.1 | Educators develop activities that match each student’s developmental level and culture-based learning needs.                                                                                                                                                                                                                         |
| GIFT.PK-12.1.3   | Self-Understanding. Students with gifts and talents demonstrate understanding of and respect for similarities and differences between themselves and their peer group and others in the general population.                                                                                                                          |
| GIFT.PK-12.1.3.1 | Educators provide a variety of research-based grouping practices for students with gifts and talents that allow them to interact with individuals of various gifts, talents, abilities, and strengths.                                                                                                                               |
| GIFT.PK-12.1.3.2 | Educators model respect for individuals with diverse abilities, strengths, and goals.                                                                                                                                                                                                                                                |
| GIFT.PK-12.1.4   | Awareness of Needs. Students with gifts and talents access resources from the community to support cognitive and affective needs, including social interactions with others having similar interests and abilities or experiences, including same-age peers and mentors or experts.                                                  |
| GIFT.PK-12.1.5.1 | Educators collaborate with families in accessing resources to develop their child’s talents.                                                                                                                                                                                                                                         |
| GIFT.PK-12.1.6   | Cognitive and Affective Growth. Students with gifts and talents benefit from meaningful and challenging learning activities addressing their unique characteristics and needs.                                                                                                                                                       |
| GIFT.PK-12.1.6.1 | Educators design interventions for students to develop cognitive and affective growth that is based on research of effective practices.                                                                                                                                                                                              |
| GIFT.PK-12.1.6.2 | Educators develop specialized intervention services for students with gifts and talents who are underachieving and are now learning and developing their talents.                                                                                                                                                                    |
| GIFT.PK-12.1.7   | Cognitive and Affective Growth. Students with gifts and talents recognize their preferred approaches to learning and expand their repertoire.                                                                                                                                                                                        |
| GIFT.PK-12.1.7.1 | Teachers enable students to identify their preferred approaches to learning, accommodate these preferences, and expand them.                                                                                                                                                                                                         |
| GIFT.PK-12.1.8   | Cognitive and Affective Growth. Students with gifts and talents identify future career goals that match their talents and abilities and resources needed to meet those goals (e.g., higher education opportunities, mentors, financial support).                                                                                     |
| GIFT.PK-12.2.1   | Identification. All students in grades PK-12 have equal access to a comprehensive assessment system that allows them to demonstrate diverse characteristics and behaviors that are associated with giftedness.                                                                                                                       |
| GIFT.PK-12.2.1.1 | Educators develop environments and instructional activities that encourage students to express diverse characteristics and behaviors that are associated with giftedness.                                                                                                                                                            |
| GIFT.PK-12.2.1.2 | Educators provide parents/guardians with information regarding diverse characteristics and behaviors that are associated with giftedness.                                                                                                                                                                                            |
| GIFT.PK-12.2.2   | Identification. Each student reveals his or her exceptionalities or potential through assessment evidence so that appropriate instructional accommodations and modifications can be provided.                                                                                                                                        |
| GIFT.PK-12.2.2.1 | Educators establish comprehensive, cohesive, and ongoing procedures for identifying and serving students with gifts and talents. These provisions include informed consent, committee review, student retention, student reassessment, student exiting, and appeals procedures for both entry and exit from gifted program services. |
| GIFT.PK-12.2.2.2 | Educators select and use multiple assessments that measure diverse abilities, talents, and strengths that are based on current theories, models, and research.                                                                                                                                                                       |
| GIFT.PK-12.2.2.3 | Assessments provide qualitative and quantitative information from a variety of sources,                                                                                                                                                                                                                                              |

including off-level testing, are nonbiased and equitable, and are technically adequate for the purpose.

|                  |                                                                                                                                                                                                                                                                                                               |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| GIFT.PK-12.2.2.4 | Educators have knowledge of student exceptionalities and collect assessment data while adjusting curriculum and instruction to learn about each student's developmental level and aptitude for learning.                                                                                                      |
| GIFT.PK-12.2.2.5 | Educators interpret multiple assessments in different domains and understand the uses and limitations of the assessments in identifying the needs of students with gifts and talents.                                                                                                                         |
| GIFT.PK-12.2.2.6 | Educators inform all parents/guardians about the identification process. Teachers obtain parental/guardian permission for assessments, use culturally sensitive checklists, and elicit evidence regarding the child's interests and potential outside of the classroom setting.                               |
| GIFT.PK-12.2.3   | Identification. Students with identified needs represent diverse backgrounds and reflect the total student population of the district.                                                                                                                                                                        |
| GIFT.PK-12.2.4   | Learning Progress and Outcomes. Students with gifts and talents demonstrate advanced and complex learning as a result of using multiple, appropriate, and ongoing assessments.                                                                                                                                |
| GIFT.PK-12.2.5   | Evaluation of Programming. Students identified with gifts and talents demonstrate important learning progress as a result of programming and services.                                                                                                                                                        |
| GIFT.PK-12.3.1   | Curriculum Planning. Students with gifts and talents demonstrate growth commensurate with aptitude during the school year.                                                                                                                                                                                    |
| GIFT.PK-12.3.4   | Instructional Strategies. Students with gifts and talents become independent investigators.                                                                                                                                                                                                                   |
| GIFT.PK-12.3.4.1 | Educators use critical-thinking strategies to meet the needs of students with gifts and talents.                                                                                                                                                                                                              |
| GIFT.PK-12.3.4.2 | Educators use creative-thinking strategies to meet the needs of students with gifts and talents.                                                                                                                                                                                                              |
| GIFT.PK-12.3.4.3 | Educators use problem-solving model strategies to meet the needs of students with gifts and talents.                                                                                                                                                                                                          |
| GIFT.PK-12.3.4.4 | Educators use inquiry models to meet the needs of students with gifts and talents.                                                                                                                                                                                                                            |
| GIFT.PK-12.3.5   | Culturally Relevant Curriculum. Students with gifts and talents develop knowledge and skills for living and being productive in a multicultural, diverse, and global society.                                                                                                                                 |
| GIFT.PK-12.3.5.1 | Educators develop and use challenging, culturally responsive curriculum to engage all students with gifts and talents.                                                                                                                                                                                        |
| GIFT.PK-12.3.6   | Resources. Students with gifts and talents benefit from gifted education programming that provides a variety of high quality resources and materials.                                                                                                                                                         |
| GIFT.PK-12.4.1   | Personal Competence. Students with gifts and talents demonstrate growth in personal competence and dispositions for exceptional academic and creative productivity. These include self-awareness, self-advocacy, self-efficacy, confidence, motivation, resilience, independence, curiosity, and risk taking. |
| GIFT.PK-12.4.1.1 | Educators maintain high expectations for all students with gifts and talents as evidenced in meaningful and challenging activities.                                                                                                                                                                           |
| GIFT.PK-12.4.2   | Social Competence. Students with gifts and talents develop social competence manifested in positive peer relationships and social interactions.                                                                                                                                                               |
| GIFT.PK-12.4.2.1 | Educators understand the needs of students with gifts and talents for both solitude and social interaction.                                                                                                                                                                                                   |
| GIFT.PK-12.4.3   | Leadership. Students with gifts and talents demonstrate personal and social responsibility and leadership skills.                                                                                                                                                                                             |
| GIFT.PK-12.4.3.1 | Educators establish a safe and welcoming climate for addressing social issues and developing personal responsibility.                                                                                                                                                                                         |
| GIFT.PK-12.4.4   | Cultural Competence. Students with gifts and talents value their own and others'                                                                                                                                                                                                                              |

language, heritage, and circumstance. They possess skills in communicating, teaming, and collaborating with diverse individuals and across diverse groups.<sup>1</sup> They use positive strategies to address social issues, including discrimination and stereotyping.

GIFT.PK-12.4.4.1

Educators model appreciation for and sensitivity to students' diverse backgrounds and languages.

GIFT.PK-12.5.1

Variety of Programming. Students with gifts and talents participate in a variety of evidence-based programming options that enhance performance in cognitive and affective areas.

Educators, recognizing the learning and developmental differences of students with gifts and talents, promote ongoing self-understanding, awareness of their needs, and cognitive and affective growth of these students in school, home, and community settings to ensure specific student outcomes.

## **Essential Questions**

---

Why are STEM skills important?

How does the design process promote innovation?

How are hands-on projects and learning beneficial?

What can I do when I am stuck?

How can failure help me to succeed?

## **Instructional Plan**

---

This unit introduces students to the STEM design process and allows students to apply the method to hands-on projects working collaboratively and independently.

Students will for each challenge:

1. Identify a problem: Consider the need for the project, relevant social and economic conditions, and any constraints or requirements.
2. Research: Gather evidence and access prior knowledge to help solve the problem.
3. Brainstorm solutions: Consider how others have approached the problem and sketch possible plans.
4. Build a model or prototype: A prototype is an operating version of the solution that allows the designer to test how it will work.
5. Test and refine: Test the model or prototype and analyze it with others. Redesign based on feedback and retest as needed.
6. Communicate: Defend your solution based on evidence and work collaboratively with peers to critique and build on their idea

## **1 What is the Design Process?**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning about expectations and rules for G&T class for this unit.

We are learning about the design process.

We are learning about the value of failure.

We are learning about famous scientists/engineers.

### **Student Success Criteria ... “I can statements”**

I can follow the expectations for STEM G&T.

I can understand each step of the design process.

I can discuss the failure of failure, connecting it to my life.

I can learn about famous scientists and engineers, taking inspiration and motivation for the upcoming unit.

### **Instructional Strategies and Activities**

1. Review G&T rules and expectations
2. Introduce unit goals and timeline
3. 5-10 minute EASY intro STEM challenge.
4. Introduce the design process. Review and discuss each step.

5. View and discuss a design process video. [BrainPop Design Process](#)
6. Discuss grit and failure. Watch video. [Crash Course Kids Failure](#) [How To Fail](#)
7. Organize (consider partnerships) and reflect for upcoming unit.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

### **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

Gifted & Talented Drive([Linked here](#))

### **Reflections and Suggested Modifications**

## **2 Introduce The Challenge**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

### **Student Success Criteria ... "I can statements"**

I can identify a problem.

I can consider the constraints and requirements of the challenge.

I can gather appropriate materials.

I can work independently and collaboratively with a positive attitude, not giving up.

### **Instructional Strategies and Activities**

1. Introduce challenge (Possibly WIGgle Bots or something similar) What is a wiggle bot? [Video](#)
2. Whole class discussion and brainstorming.
3. Collaboratively or independently begin the design process with some teacher guidance. The teacher will assist students in tracking their progress with the process.
4. Students- Identify a problem: Consider the need for the project, relevant social and economic conditions, and any constraints or requirements.
5. Introduce the [GO GUIDE- if WiggleBots](#)
6. Gather materials in preparation for the next class.
7. Discuss and reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

### **Instructional Materials and Resources**

## Reflections and Suggested Modifications

### 3 Research and Brainstorm

---

#### Student Learning Intentions or We are learning to ... (WALT)

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

#### Student Success Criteria ... “I can statements”

I can research the challenge.

I can consider the constraints and requirements of the challenge.

I can brainstorm and plan my prototype.

I can work independently and collaboratively with a positive attitude, and not give up.

#### Instructional Strategies and Activities

1. Introduce the challenge. Review [GO GUIDE- if WiggleBots](#)
2. Whole class discussion and brainstorming.
3. Try out the materials- motor, batteries, etc.
4. Students- Research: Gather evidence and access prior knowledge to help solve the problem.
5. Students- Brainstorm solutions: Consider how others have approached the problem and sketch possible plans.
6. Discuss
7. Reflect

#### Formative Assessments

- 1) Observation
- 2) Class discussion

- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

### **Reflections and Suggested Modifications**

## **4 Build and Test**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

### **Student Success Criteria ... "I can statements"**

I can identify a problem.

I can research.

I can brainstorm.

I can gather appropriate materials.

I can consider the constraints and requirement of the challenge.

I can build a prototype of my design.

I can work independently and collaboratively with a positive attitude, not giving up.

## **Instructional Strategies and Activities**

1. Review challenge.
2. Whole class discussion and brainstorm. Gather materials.
3. Collaboratively or independently begin the design process.
4. Students- Build a model or prototype: A prototype is an operating version of the solution that allows the designer to test how it will work.
5. Discuss
6. Reflect

## **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

## **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

Gifted & Talented Drive([Linked here](#))

## **Reflections and Suggested Modifications**

## **5 Revise and Build**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

### **Student Success Criteria ... “I can statements”**

I can build a prototype.

I can test my prototype.

I can I can improve my design.

I can discuss and share with my class.

I can work independently and collaboratively with a positive attitude, and not giving up.

### **Instructional Strategies and Activities**

1. Introduce the challenge. Teacher reminds students of the rules of the challenge/problem.
2. Whole class discussion and brainstorming.
3. Students might discuss their progress, goals, and concerns in a small group.
4. Students- Build a model or prototype: A prototype is an operating version of the solution that allows the designer to test how it will work.
5. Students- Test and refine: Test the model or prototype and analyze it with others. Redesign based on feedback and retest as needed.
6. Clean up materials.
7. Discuss.
8. Reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

## **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

## **Reflections and Suggested Modifications**

## **6 Build/Revise and Test**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

### **Student Success Criteria ... "I can statements"**

I can identify a problem.

I can research.

I can brainstorm.

I can gather appropriate materials.

I can build a prototype.

I can test my prototype.

I can I can improve my design.

I can discuss and share with my class.

I can work independently and collaboratively with a positive attitude, and not giving up.

### **Instructional Strategies and Activities**

1. Teacher reminds students of the rules of the challenge/problem. Reviews design process.
2. Whole class discussion and brainstorming. Discuss possible tweaks and revisions. Students might consider

a new design or revising the current design.

3. Students- Identify a problem: Consider the need for the project, relevant social and economic conditions, and any constraints or requirements.
4. Students- Research: Gather evidence and access prior knowledge to help solve the problem.
5. Students- Brainstorm solutions: Consider how others have approached the problem and sketch possible plans.
6. Students- Build a model or prototype: A prototype is an operating version of the solution that allows the designer to test how it will work.
7. Students- Test and refine: Test the model or prototype and analyze it with others. Redesign based on feedback and retest as needed.
8. Students- Communicate: Defend your solution based on evidence and work collaboratively with peers to critique and build on their ideas
9. Discuss.
10. Reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

### **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

Gifted & Talented Drive([Linked here](#))

### **Reflections and Suggested Modifications**

## **7 Revise and Finalize**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

### **Student Success Criteria ... "I can statements"**

I can build a prototype.

I can test my prototype.

I can improve my design.

I can discuss and share with my class.

I can work independently and collaboratively with a positive attitude, and not giving up.

### **Instructional Strategies and Activities**

1. Review challenge expectations and rules. Emphasize this is the last day to revise and test.
2. Discuss each design. Students might choose their "best" prototype to finalize.
3. Students- Test and refine: Test the model or prototype and analyze it with others. Redesign based on feedback and retest as needed.
4. Students- Communicate: Defend your solution based on evidence and work collaboratively with peers to critique and build on their ideas
5. Discuss.
6. Reflect.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment

5) STEM Challenge

6) Exit ticket

### **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

Gifted & Talented Drive([Linked here](#))

### **Reflections and Suggested Modifications**

## **8 Name, Decorate, Personalize, Accessorize, Write Up**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to use the design process to tackle STEM challenges.

We are learning to work collaboratively and independently.

We are learning to embrace and learn from failure.

We are learning to share our designs and present to our class.

### **Student Success Criteria ... "I can statements"**

I can build a prototype.

I can test my prototype.

I can I can improve my design.

I can discuss and share with my class.

I can name and decorate my design.

I can write up my design, explaining my process and my design.

I can work independently and collaboratively with a positive attitude, and not giving up.

I can present my design and process to my class.

## **Instructional Strategies and Activities**

1. Review challenge expectations and rules.
2. Introduce the final stage- personalizing the design and preparing to GO PUBLIC and present the design.
3. Students will gather materials decorate and personalize their design. Consider color, flare, decorations, etc..
4. Students will name their design.
5. Students will write up their design. Students will explain the design's purpose and their process. Perhaps on an index card.
6. Students- Test and refine: Test the model or prototype and analyze it with others. Redesign based on feedback and retest as needed.
7. Students- Communicate: Defend your solution based on evidence and work collaboratively with peers to critique and build on their ideas
8. Discuss
9. Reflect.

## **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) STEM Challenge
- 6) Exit ticket

## **Instructional Materials and Resources**

Gifted & Talented Website([Linked here](#))

"Rules & Expectations" Slide to present and displayed in Google Classroom ([Linked here](#))

Gifted & Talented Drive([Linked here](#))

## **Reflections and Suggested Modifications**

## **9 Presentation To Class**

---

### **Student Learning Intentions or We are learning to ... (WALT)**

We are learning to share our design process knowledge to the class.

We are learning to present our greatest successes and/or failures to our class.

We are learning to accept and respectfully answer the questions of our classmates.

### **Student Success Criteria ... “I can statements”**

I can explain the design process using a chart.

I can share one of my projects with the class, explaining my process.

I can answer my classmates' questions.

I can celebrate my process and accomplishments

### **Instructional Strategies and Activities**

1. Teacher explains and models presentation rules and expectations.
2. Students will present the design and explain their process to their class.
3. Each student will share and discuss a project.
4. Each student will respond to a Q&A.
5. Post-presentation reflection.

### **Formative Assessments**

- 1) Observation
- 2) Class discussion
- 3) Group Work
- 4) Self Assessment
- 5) Presentation
- 6) Exit Ticket

## **Instructional Materials and Resources**

## **Modifications and/or Accommodations**

---

### **Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)**

#### **English Language Learners**

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

Front-Loading Vocabulary: The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

#### **Special Education Students**

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Oral Reading: The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

Timers: The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

#### **Students with 504 Plans**

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily

overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

## **Gifted & Talented Strategies**

**Extensions/Enrichments:** Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply acquired knowledge, and/or to produce something in reference to acquired knowledge.

**Modify/Change Activities:** Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

## **Students at Risk of School Failure**

**Directions or Instructions:** Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

**Peer Support:** Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

**Alternate or Modified Assignments:** Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

**Increase One to One Time:** When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

**Contracts:** It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

**Hands On:** As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

**Tests/Assessments:** Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

**Seating:** Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.

design a solution. Testing a solution involves investigating how well it performs under a range of likely conditions.

At whatever stage, communicating with peers about proposed solutions is an important part of the design process, and shared ideas can lead to improved designs.

Influence of Engineering, Technology, and Science on Society and the Natural World

Engineers improve existing technologies or develop new ones to increase their benefits, decrease known risks, and meet societal demands.

SCI.3-5-ETS1-3

Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.

Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.

Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered.

SCI.3-5.ETS1.B

Developing Possible Solutions

Tests are often designed to identify failure points or difficulties, which suggest the elements of the design that need to be improved.

SCI.3-5.ETS1.C

Optimizing the Design Solution

Different solutions need to be tested in order to determine which of them best solves the problem, given the criteria and the constraints.

## **Integration of Career Readiness, Life Literacies and Key Skills**

---

TECH.9.4.5.CI

Creativity and Innovation

TECH.9.4.5.CI.1

Use appropriate communication technologies to collaborate with individuals with diverse perspectives about a local and/or global climate change issue and deliberate about possible solutions (e.g., W.4.6, 3.MD.B.3,7.1.NM.IPERS.6).

TECH.9.4.5.CI.2

Investigate a persistent local or global issue, such as climate change, and collaborate with individuals with diverse perspectives to improve upon current actions designed to address the issue (e.g., 6.3.5.CivicsPD.3, W.5.7).

TECH.9.4.5.CI.3

Participate in a brainstorming session with individuals with diverse perspectives to expand one's thinking about a topic of curiosity (e.g., 8.2.5.ED.2, 1.5.5.CR1a).

TECH.9.4.5.CI.4

Research the development process of a product and identify the role of failure as a part of the creative process (e.g., W.4.7, 8.2.5.ED.6).

TECH.9.4.5.CT

Critical Thinking and Problem-solving

TECH.9.4.5.CT.1

Identify and gather relevant data that will aid in the problem-solving process (e.g., 2.1.5.EH.4, 4-ESS3-1, 6.3.5.CivicsPD.2).

TECH.9.4.5.CT.2

Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem (e.g., 2.1.5.CHSS.1, 4-ESS3-1).

TECH.9.4.5.CT.3

Describe how digital tools and technology may be used to solve problems.

TECH.9.4.5.CT.4

Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global (e.g., 6.1.5.CivicsCM.3).

TECH.9.4.5.GCA

Global and Cultural Awareness

Collaboration with individuals with diverse perspectives can result in new ways of thinking and/or innovative solutions.

Culture and geography can shape an individual's experiences and perspectives.

The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.

Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills.

Collaborating digitally as a team can often develop a better artifact than an individual working alone.

| MATH.K-12.1 | <p>Make sense of problems and persevere in solving them</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints,</p> |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MATH.K-12.2

Reason abstractly and quantitatively

Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.

MATH.K-12.3

Construct viable arguments and critique the reasoning of others

MATH.K-12.8

Look for and express regularity in repeated reasoning

Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation  $(y - 2)/(x - 1) = 3$ . Noticing the regularity in the way terms cancel when expanding  $(x - 1)(x + 1)$ ,  $(x - 1)(x^2 + x + 1)$  and  $(x - 1)(x^3 + x^2 + x + 1)$  might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
