

# Unit 02: Force Olympics: Pushes & Pulls

Content Area: **Template**  
Course(s):  
Time Period: **Full Year**  
Length: **FY**  
Status: **Published**

## Standards Alignment

---

### New Jersey Student Learning Standards

---

|            |   |
|------------|---|
| K-2-ETS1   | Engineering Design  |
| K-2-ETS1-1 | Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool. |
| K-2-ETS1-2 | Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.  |
| K-2-ETS1-3 | Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.   |
| K-PS2      | Motion and Stability: Forces and Interactions   |
| K-PS2-1    | Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.   |
| K-PS2-2    | Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.   |

### Integration of Career Readiness, Life Literacies and Key Skills

---

|                |  |
|----------------|--|
| CRP.K-12.CRP1  | Act as a responsible and contributing citizen and employee.                        |
| CRP.K-12.CRP2  | Apply appropriate academic and technical skills.                                   |
| CRP.K-12.CRP3  | Attend to personal health and financial well-being.                                |
| CRP.K-12.CRP4  | Communicate clearly and effectively and with reason.                               |
| CRP.K-12.CRP5  | Consider the environmental, social and economic impacts of decisions.              |
| CRP.K-12.CRP6  | Demonstrate creativity and innovation.   |
| CRP.K-12.CRP7  | Employ valid and reliable research strategies.                                     |
| CRP.K-12.CRP8  | Utilize critical thinking to make sense of problems and persevere in solving them. |
| CRP.K-12.CRP9  | Model integrity, ethical leadership and effective management.                      |
| CRP.K-12.CRP10 | Plan education and career paths aligned to personal goals.                         |
| CRP.K-12.CRP11 | Use technology to enhance productivity.  |
| CRP.K-12.CRP12 | Work productively in teams while using cultural global competence.                 |

## Technology / Integration of Computer Science and Design Thinking

---

|                |   |
|----------------|---|
| TECH.8.1.2     | Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.  |
| TECH.8.1.2.A   | Technology Operations and Concepts: Students demonstrate a sound understanding of technology concepts, systems and operations   |
| TECH.8.1.2.A.4 | Demonstrate developmentally appropriate navigation skills in virtual environments (i.e., games, museums).   |
| TECH.8.1.2.E   | Research and Information Fluency: Students apply digital tools to gather, evaluate, and use information.  |
| TECH.8.1.2.E.1 | Use digital tools and online resources to explore a problem or issue.   |
| TECH.8.2.2     | Technology Education, Engineering, Design, and Computational Thinking - Programming: All students will develop an understanding of the nature and impact of technology, engineering, technological design, computational thinking and the designed world as they relate to the individual, global society, and the environment. |
| TECH.8.2.2.A   | The Nature of Technology: Creativity and Innovation: Technology systems impact every aspect of the world in which we live.  |
| TECH.8.2.2.A.1 | Define products produced as a result of technology or of nature.  |
| TECH.8.2.2.A.2 | Describe how designed products and systems are useful at school, home and work.   |
| TECH.8.2.2.A.3 | Identify a system and the components that work together to accomplish its purpose.  |
| TECH.8.2.2.A.5 | Collaborate to design a solution to a problem affecting the community.  |
| TECH.8.2.2.B   | Technology and Society: Knowledge and understanding of human, cultural and society values are fundamental when designing technology systems and products in the global society.   |
| TECH.8.2.2.B.1 | Identify how technology impacts or improves life.   |
| TECH.8.2.2.C   | Design: The design process is a systematic approach to solving problems.  |
| TECH.8.2.2.C.1 | Brainstorm ideas on how to solve a problem or build a product.  |

## Interdisciplinary Connections: NJSL for ELA, Social Studies, Science and/or Math Section

---

|                   |   |
|-------------------|---|
| LA.K-12.NJLSA.R   | Reading<br>Craft and Structure  |
| LA.K-12.NJLSA.R4  | Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone. |
| LA.K-12.NJLSA.R6  | Assess how point of view or purpose shapes the content and style of a text.<br>Integration of Knowledge and Ideas   |
| LA.K-12.NJLSA.R7  | Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.<br>Range of Reading and Level of Text Complexity         |
| LA.K-12.NJLSA.R10 | Read and comprehend complex literary and informational texts independently and proficiently with scaffolding as needed.   |
| LA.RI.K.4         | With prompting and support, ask and answer questions about unknown words in a text.   |

|                    |  |
|--------------------|--|
| LA.RI.K.6          | Name the author and illustrator of a text and define the role of each in presenting the ideas or information in a text.  |
| LA.RI.K.7          | With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).                      |
| LA.RI.K.10         | Actively engage in group reading activities with purpose and understanding.  |
| LA.K-12.NJSLSA.SL  | Speaking and Listening<br>Comprehension and Collaboration  |
| LA.K-12.NJSLSA.SL1 | Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.                         |
| LA.K-12.NJSLSA.SL2 | Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LA.K-12.NJSLSA.SL3 | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric.   |
| LA.K-12.NJSLSA.SL5 | Make strategic use of digital media and visual displays of data to express information and enhance understanding of presentations.   |
| LA.K-12.NJSLSA.SL6 | Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.  |
| LA.SL.K.1          | Participate in collaborative conversations with diverse partners about kindergarten topics and texts with peers and adults in small and larger groups.   |
| LA.SL.K.1.A        | Follow agreed-upon norms for discussions (e.g., listening to others with care and taking turns speaking about the topics and texts under discussion).  |
| LA.SL.K.1.B        | Continue a conversation through multiple exchanges.  |
| LA.SL.K.2          | Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood. |
| LA.SL.K.3          | Ask and answer questions in order to seek help, get information, or clarify something that is not understood.  |
| LA.SL.K.5          | Add drawings or other visual displays to descriptions as desired to provide additional detail.   |
| LA.SL.K.6          | Speak audibly and express thoughts, feelings, and ideas clearly.   |

## **Integration of Diversity, Equity and Inclusion; Climate Change; Informational and Media LiteracyNew Section**

see Crosswalks

---

## **21st Century Life and Careers**

---

### **Stage I: Desired Results**

## Transfer/Overview/Rationale

---

### Transfer / Overview / Rationale

#### Unit Rationale

The purpose of this unit...

**This unit will allow students to study different machines, as well as how their size and strength can affect force and motion.**

## Meaning

---

## Essential Questions

---

### Essential Questions

- What's the biggest excavator?
- Why do builders need so many big machines?
- How can you knock down a wall made of concrete?
- How can you knock down the most bowling pins?
- How can we protect a mountain town from falling rocks?
- How could you invent a trap?

## **Enduring Understanding/Indicators of Understanding**

---

### Enduring Understanding/Indicators of Understanding

- Machines make work easier.
- Different machines are made for different jobs.
- Machines create force.
- The bigger the push or pull, the more an object moves.
- Inventors create new things to make jobs easier.

## **Acquisition (Student Learning Objectives)**

---

### **Knowledge**

---

#### Knowledge

Students will know...

- There is a relationship between machines and work.
- "Work words" describe some ways in which machines work.
- Machines (i.e. wrecking balls) can be manipulated to create a stronger or weaker force on different objects.

- There is a relationship between size of an object, force, and direction.
- Change to structure and function of materials can create new inventions to solve problems.

## **Skills**

---

### Skills

Student will be skilled at ...

- Obtaining information through observation of machines
- Arguing evidence of how machines can make work easier
- Using "work words" to communicate different jobs of machines
- Carrying out investigations by testing the height of homemade wrecking balls
- Identifying problems and designing solutions using models

## **Stage 3: Learning Plan**

---

## **Resource and Mentor Texts**

---

Resources and Mentor Texts

Mystery Science

**Waring, G. Oscar and the Cricket: A Book About Moving and Rolling**

**Mayer, L. Newton and Me**

**Llewellyn, C. And Everyone Shouted: Pull!**

## **Formative Assessment Strategies**

---

Formative Assessment Strategies

- Class discussions
- Turn & talk/thumbs up, thumbs down
- "Act it out" activities
- Small group work- wrecking ball & Tiny Town
- Additional activities/resources provided by Mystery Science

## **Learning Activities/Unit of Study**

---

Learning Activities/Unit of Study

Each Science unit is comprised of different activities, or "mysteries," that include small group activities, investigations/experiments, or read alouds. The learning activities attached below are for the specific mysteries that need detailed instructions for this unit. All mysteries can be found on the Mystery Science website under each specific unit.

## **Modifications and/or Accommodations**

---

### **Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)**

#### **English Language Learners**

**Native language support:** The teacher provides auditory or written content to students in their native language.

**Adjusted Speech:** The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

**Visuals:** The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

**Front-Loading Vocabulary:** The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

#### **Special Education Students**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

**Oral Reading:** The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

**Timers:** The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

## **Students with 504 Plans**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

## **Gifted & Talented Strategies**

**Extensions/Enrichments:** Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply acquired knowledge, and/or to produce something in reference to acquired knowledge.

**Modify/Change Activities:** Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

## **Students at Risk of School Failure**

**Directions or Instructions:** Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

**Peer Support:** Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for

clarification before going to you.

**Alternate or Modified Assignments:** Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

**Increase One to One Time:** When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

**Contracts:** It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

**Hands On:** As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

**Tests/Assessments:** Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

**Seating:** Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.
