This unit will introduce students to the foundational documents and philosophies on which the United States government is built.

Meaning

Essential Questions

Essential Questions

- How did the founders of the U.S. Constitution attempt to protect individual liberty, while also promoting public order and safety?
- How have theory, debate, and compromise influenced the U.S. Constitutional system?
- How does the development and interpretation of the Constitution influence policies that impact citizens and residents of the U.S.?

Enduring Understanding/Indicators of Understanding

Enduring Understanding/Indicators of Understanding

- A balance between governmental power and individual rights has been a hallmark of American political development.
- The Constitution emerged from the debate about the weaknesses in the Articles of Confederation as a blueprint for limited government.
- The Constitution created a competitive policy-making process to ensure the people's will is represented and that freedom is preserved.
- Federalism reflects the dynamic distribution of power between national and state governments.

Acquisition (Student Learning Objectives)

Knowledge

Knowledge

Students will know...

- The U.S. government is based on ideas of limited government, including natural rights, popular sovereignty, republicanism, and social contract.
- The Declaration of Independence, drafted by Jefferson with help from Adams and Franklin, provides a foundation for popular sovereignty, while the U.S. Constitution drafted at the Philadelphia convention led by George Washington, with important contributions from Madison, Hamilton, and members of the "grand committee," provides the blueprint for a unique form of political democracy in the U.S.
- Representative democracies can take several forms along this scale:
 - Participatory democracy, which emphasizes broad participation in politics and civil society
 - Pluralist democracy, which recognizes group-based activism by nongovernmental interests striving for impact on political decision making
 - Elite democracy, which emphasizes limited participation in politics and civil society
- Different aspects of the U.S. Constitution, as well as the debate between the Federalist No. 10 and Brutus No. 1, reflect the tension between the broad participatory model and the more filtered participation of the pluralist and elite models.
- The three models of representative democracy continue to be reflected in contemporary institutions and political behavior.
- Madison's arguments in Federalist No. 10 focused on the superiority of a large republic in controlling the "mischiefs of faction," delegating authority to elected representatives and dispersing power between the states and national government.
- Anti-Federalist writings, including Brutus No. 1, adhered to popular democratic theory that emphasized the benefits of a small decentralized republic while warning of the dangers to personal liberty from a large, centralized government.
- Specific incidents and legal challenges that highlighted key weaknesses of the Articles of Confederation are represented by the:
 - Lack of centralized military power to address Shays' Rebellion
 - Lack of tax-law enforcement power
- Compromises deemed necessary for adoption and ratification of the Constitution are represented by the:
 - Great (Connecticut) Compromise
 - Electoral College

- Three-Fifths Compromise
 - Compromise on the importation of slaves
- Debates about self-government during the drafting of the Constitution necessitated the drafting of an amendment process in Article V that entailed either a two-thirds vote in both houses or a proposal from two-thirds of the state legislatures, with final ratification determined by three-fourths of the states.
- The compromises necessary to secure ratification of the Constitution left some matters unresolved that continue to generate discussion and debate today.
- The debate over the role of the central government, the powers of state governments, and the rights of individuals remains at the heart of present-day constitutional issues about democracy and governmental power, as represented by:
 - Debates about government surveillance resulting from the federal government's response to the 9/11 attacks
 - The debate about the role of the federal government in public school education
- The powers allocated to Congress, the president, and the courts demonstrate the separation of powers and checks and balances features of the U.S. Constitution
- Federalist No. 51 explains how constitutional provisions of separation of powers and checks and balances control abuses by majorities.
- Multiple access points for stakeholders and institutions to influence public policy flows from the separation of powers and checks and balances.
- Impeachment, removal, and other legal actions taken against public officials deemed to have abused their power reflect the purpose of checks and balances.
- The exclusive and concurrent powers of the national and state governments help explain the negotiations over the balance of power between the two levels.
- The distribution of power between federal and state governments to meet the needs of society changes, as reflected by grants, incentives, and aid programs, including federal revenue sharing, mandates, categorical grants, and block grants.
- The interpretation of the Tenth and Fourteenth Amendments, the commerce clause, the necessary and proper clause, and other enumerated and implied powers is at the heart of the debate over the balance of power between the national and state governments.
- The balance of power between the national and state governments has changed over time based on U.S. Supreme Court interpretation of such cases as:
 - *McCulloch v. Maryland* (1819), which declared that Congress has implied powers necessary to implement its enumerated powers and established supremacy of the U.S. Constitution and federal laws over state laws
 - *United States v. Lopez* (1995), which ruled that Congress may not use the commerce clause to make possession of a gun in a school zone a federal crime, introducing a new phase of federalism that recognized the importance of state sovereignty and local control
- Multiple access points for stakeholders and institutions to influence public policy flows from the allocation of powers between national and state governments.
- National policymaking is constrained by the sharing of power between and among the three branches and state governments.

Modifications and/or Accommodations

Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)

English Language Learners

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

Front-Loading Vocabulary: The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

Special Education Students

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Oral Reading: The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

Timers: The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

Students with 504 Plans

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Gifted & Talented Strategies

Extensions/Enrichments: Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply acquired knowledge, and/or to produce something in reference to acquired knowledge.

Modify/Change Activities: Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

Students at Risk of School Failure

Directions or Instructions: Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

Peer Support: Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

Alternate or Modified Assignments: Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

Increase One to One Time: When other students are working, always touch base with your students

at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

Contracts: It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

Hands On: As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

Tests/Assessments: Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

Seating: Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.
