### **Stage I: Desired Results**

---

### **Transfer/Overview/Rationale**

<b>Transfer / Overview / Rationale</b>
<p>Unit Rationale The purpose of this unit...</p> <p>Prior to students immersing themselves in the historical obstacles confronted and accomplishments achieved by members of each of the cultural groups they will study in this course, it is vital for them to objectively reflect on the numerous identity groups to which each of them belongs, i.e., family, friends, school, church, etc., and consider the ways in which they navigate between these groups and adapt to the influences and pressures unique to each. Only then can they determine where they are from, who they are, and where they are going. This will provide them with the ability to gain an understanding of members of cultures other than their own, to recognize similarities and respect and</p>

tolerate differences.

## **Meaning**

---

### **Essential Questions**

---

#### Essential Questions

In what way does family history and culture shape who we are?

What adaptations do we make to successfully navigate between multiple groups and what is the resulting impact on our identity?

What influence do the traits of our dominant culture have on our identity?

Who am I at the intersection of my many identity groups?

Do others share this experience? In what ways are they similar or different?

### **Enduring Understanding/Indicators of Understanding**

---

#### Enduring Understanding/Indicators of Understanding

Our identity is shaped by our family history and cultural background, and, thus, we must evaluate and describe the ways in which our own unique identity is shaped and modified as we move between multiple identity groups.

It is important to recognize the traits of our dominant culture and evaluate the ways in which our unique identity is expressed at the intersection of those multiple groups.

Others are shaped by familial, historical and cultural backgrounds, as well, and, therefore, we must interact with respect and tolerance with those who are similar or different from ourselves.

## **Acquisition (Student Learning Objectives)**

---

### **Knowledge**

---

Knowledge

Students will know...

Their family history and culture

The identity groups to which they belong

Their dominant culture and its traits

The ways in which they adapt their identities for each group

That other share their experience

That they should understand and respect the cultural differences found in others

### **Skills**

---

Skills

Student will be skilled at ...

Investigating their family history and culture

Identifying their multiple membership groups and analyzing the adaptations to their identity they make within each

Evaluating their dominant culture's traits and its impact on their identity

Determining that others share this experience and should be respected, whether similar or different from themselves.

Learning Activities/Unit of Study

You're Never too Old for Picture Books: Students will explore (Montessori style) numerous picture books centered on diversity and tolerance and will discuss the way in which children's attitudes are shaped and influenced by adults. They will examine and discuss a meme with the caption, "Children will play with anyone, until a parent tells them not to." They

will, then, read and discuss the lyrics to a Rodgers and Hammerstein song, "You've Got to be Carefully Taught."

Students will read numerous digital excerpts and poems from Teaching Tolerance's Perspectives, centered on identity. They will, then, select seven of these to complete their reading log, in Google Classroom. Their logs will address connections made, challenges to their thinking, key concepts, changes in their thinking, and what they learned.

Students will complete a concept map, investigating their own family history and culture, as well as the multiple identity groups to which they belong. They will determine which is the dominant group and the traits it encourages in them. They will then consider the way in which each of these groups shape their identity.

Students will work collaboratively to color code each of their similarities and differences, to determine whether or not others have shared their experience.

Students will write a personal "Where I'm From" poem.

Students will write a personal reflection on their learning in the unit.

Students will create a ZeeMee account and begin their personal ZeeMee for the course, including their poems at this time.

## **Modifications and/or Accommodations**

---

### **Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)**

#### **English Language Learners**

**Native language support:** The teacher provides auditory or written content to students in their native language.

**Adjusted Speech:** The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

**Visuals:** The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

**Front-Loading Vocabulary:** The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

## **Special Education Students**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

**Oral Reading:** The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

**Timers:** The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

## **Students with 504 Plans**

**Chunking:** The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

**Checking for Understanding:** It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

**Extra time:** The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

## **Gifted & Talented Strategies**

**Extensions/Enrichments:** Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply

acquired knowledge, and/or to produce something in reference to acquired knowledge.

**Modify/Change Activities:** Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

## Students at Risk of School Failure

**Directions or Instructions:** Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

**Peer Support:** Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

**Alternate or Modified Assignments:** Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

**Increase One to One Time:** When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

**Contracts:** It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

**Hands On:** As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

**Tests/Assessments:** Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

**Seating:** Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.
