Stage I: Desired Results

Transfer/Overview/Rationale

Transfer / Overview / Rationale

Unit Rationale

The purpose of this unit...

With the goal of developing literacy in struggling students, extra time will be spent building a firm foundation of basic writing and grammar skills. Every unit will have a specific writing skill focus and writing assignment (as outlined in units). In addition, throughout the year, students will participate in writing and grammar workshops to learn specific strategies for effective writing. Just like other content areas, writing can be taught through step-by-step instruction and modeling. Through engaging mini-lessons, students will strengthen specific writing skills in accordance with the common core and PARCC. Students will also keep a writing portfolio and frequently self-assess, monitor growth, and edit/revise. An essential aspect of being a good writer is having a strong understanding of English grammar. Grammar will be taught on a regular basis with an emphasis on quality over quantity. There will be a focus on the "Top 5 (specified below.) The prime means of grammar assessment will be through self and peer editing in the context of their writing. Students should be able to identify their errors and have the knowledge and skills to correct them. The overall goal of this year-long unit is for students to have a stronger understanding of the English language and a toolbox of writing strategies that will enable them to successfully write for a variety of tasks and audiences

Meaning

Essential Questions

Essential Questions

1. What specific skills can students use to aid in writing for a variety of purposes?
2. How does understanding the conventions of English grammar increase student reading comprehension and quality of writing?
3. Can one be taught to be a skilled writer or is it a skill that one inherently possess and therefore, can not be learned?

Enduring Understanding/Indicators of Understanding

Enduring Understanding/Indicators of Understanding

1. Writing skills can be acquired through step-by-step instruction and modeling.
2. Reading comprehension and quality of writing improves with the acquisition of a basic understanding of conventional English grammar.
3. Strong writing skills can be built over time through routine practice, modeling, and self-assessment.

Acquisition (Student Learning Objectives)

Knowledge

Knowledge

Students will know...

- General paper guidelines (i.e spell out numbers over 100)
- Necessary components of a standard essay
- How to create clear, organized writing
- How to use direct evidence to support a claim
- Basic parts of speech (noun, verb, adjective, adverb)
- Basic sentence structure (subject, verb, object)
- Subject-Verb Agreement
- Common Sentence Structure Errors: run-ons and fragments
- Proper Comma Usage

Skills

Skills

Student will be skilled at ...

- Write an introduction paragraph (hook, transition, thesis)
- Write a conclusion paragraph (return to hook, restatement of thesis, synthesis, clincher)
- Use transitions between paragraphs and ideas
- Use consistent verb tense within a piece of writing
- Use and embed direct support
- Paraphrase from a credible source
- Identify parts of speech within the structure of a sentence
- Write diverse sentences
- Use subjects and verbs that agree
- Avoid writing run-ons and fragments
- Use commas correctly
- Avoid commonly misused words and phrases
- Strengthen writing and grammar overtime with practice of specific skills

Stage 3: Learning Plan

Resource and Mentor Texts

Resources and Mentor Texts

- The Great Grammar Book by Marsha Sramek
- Grammar Girl: Quick and Dirty Tips
- * There are two reading/writing strategy books I use, but need to get the titles from school! (Sue Beers)
- Mini-lesson PowerPoint and handouts

Formative Assessment Strategies

Formative Assessment Strategies

- Grammar Diagnostic/ Pre-test
- Class participation
- Integration of correct grammar into journals, essays, and everyday writing
- Practice/Exercises
- Peer and Self Edits
- Whole-class review
- Quizzes

Learning Activities/Unit of Study

Learning Activities/Unit of Study

- Do's and Do Not's of Writing" Power Point
- Grammar Lessons (notes, practice, editing)
- Self evaluation of growth (writing portfolios)
- Mini-lessons/reinforcement when necessary (i.e. embedding quotes using direct quotes from fairytales)
- Mini-Writing Activities (Responding to aphorisms)
- Annotation and open-ended response of high-interest current events
- Handouts and activities for specific skills practice
- Tips of the Day (commonly misused words and phrases)

Modifications and/or Accommodations

Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)

English Language Learners

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

Front-Loading Vocabulary: The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

Special Education Students

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Oral Reading: The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

Timers: The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

Students with 504 Plans

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Gifted & Talented Strategies

Extensions/Enrichments: Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply acquired knowledge, and/or to produce something in reference to acquired knowledge.

Modify/Change Activities: Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

Students at Risk of School Failure

Directions or Instructions: Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

Peer Support: Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

Alternate or Modified Assignments: Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

Increase One to One Time: When other students are working, always touch base with your students

at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

Contracts: It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

Hands On: As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

Tests/Assessments: Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

Seating: Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.
