

Unit 04: Radio Recording and Popular Music

Content Area: **Template**
Course(s):
Time Period: **Full Year**
Length: **FY**
Status: **Published**

Standards Alignment

New Jersey Student Learning Standards

Capacities of the Literate Individual

Students Who are College and Career Ready in Reading, Writing, Speaking, Listening, & Language

They demonstrate independence.

They build strong content knowledge.

They respond to the varying demands of audience, task, purpose, and discipline.

They comprehend as well as critique.

They value evidence.

They use technology and digital media strategically and capably.

They come to understand other perspectives and cultures.

Integration of Career Readiness, Life Literacies and Key Skills

| | |
|---------------|-----------------------------------------------------------------------|
| CRP.K-12.CRP1 | Act as a responsible and contributing citizen and employee. |
| CRP.K-12.CRP2 | Apply appropriate academic and technical skills. |
| CRP.K-12.CRP3 | Attend to personal health and financial well-being. |
| CRP.K-12.CRP4 | Communicate clearly and effectively and with reason. |
| CRP.K-12.CRP5 | Consider the environmental, social and economic impacts of decisions. |
| CRP.K-12.CRP6 | Demonstrate creativity and innovation. |

| | |
|----------------|------------------------------------------------------------------------------------|
| CRP.K-12.CRP7 | Employ valid and reliable research strategies. |
| CRP.K-12.CRP8 | Utilize critical thinking to make sense of problems and persevere in solving them. |
| CRP.K-12.CRP9 | Model integrity, ethical leadership and effective management. |
| CRP.K-12.CRP10 | Plan education and career paths aligned to personal goals. |
| CRP.K-12.CRP11 | Use technology to enhance productivity. |
| CRP.K-12.CRP12 | Work productively in teams while using cultural global competence. |

Technology / Integration of Computer Science and Design Thinking

Interdisciplinary Connections: NJSL for ELA, Social Studies, Science and/or Math Section

Meaning

Essential Questions

Essential Questions

What is more beneficial to radio listening: commercial or noncommercial radio?

How could you evaluate your radio listening style: FM commercial, AM commercial, non-commercial or paid radio?
What formats interest you?

Have you ever been a part of radio rating, radio call-ins or actively participated in a radio promotion? Do you believe this type of interaction contributes to the success of a radio station?

Enduring Understanding/Indicators of Understanding

Enduring Understanding/Indicators of Understanding

radio allowed long-distance wireless communication

the FCC provided broadcast regulations

advertising and network structure emerged during the Golden Age of Radio

radio stations are classified as commercial and non-commercial

radio is local, fragmented, specialized, personal and mobile

deregulation has allowed concentration of ownership in radio

four major recording companies control 90% of the industry

convergence and digital technology are reshaping the radio industry

Acquisition (Student Learning Objectives)

Knowledge

Knowledge

Students will know...

Marconi, Fessenden, DeForest, Edison and Berliner contributed to the advancement of radio broadcasting

The Radio Acts of 1910, 1912, and 1927 and The Communication Act of 1934 led to the formation of the FCC

Advertising and network structure led to the Golden Age of Radio

Radios stations are classified

Deregulation and convergence effect radio broadcast industries

Digitization effects radio recording

Skills

Skills

Student will be skilled at ...

evaluating formats of commercial radio stations.

evaluating new radio technologies such as satellite and internet radio.

understanding the history and development of radio broadcasting.

Stage 3: Learning Plan

Formative Assessment Strategies

Formative Assessment Strategies

What is the significance of KDKA and WEAf?

What characteristics define American radio during the Golden Age?

In what two forms is radio downloaded to mobile devices?

What is streaming?

What do you think of the argument that control of the recording industry by a few What inevitably lead to the homogenization of ascendance of profit in the music industry?

How much regulation do you believe is necessary in the US broadcasting industry?

Presentation of historic information and events in radio using "Radio In The Golden Age"

Researching the early history of radio broadcasting to assess ability to gather credible information

Using the internet to discover how different radio stations broadcast through streaming

Using current events as a basis to formulate news stories for radio broadcasts

Learning Activities/Unit of Study

Learning Activities/Unit of Study

DVD: Viewing Radio in the Golden age

Power Point: Researching Early history of radio broadcasting

Internet: Researching/listening to radio web sites

Radio Broadcasting: Researching/writing/recording relevant current events

Modifications and/or Accommodations

Suggested Modifications (ELL, Sp. Ed, Gifted, At-risk of Failure)

English Language Learners

Native language support: The teacher provides auditory or written content to students in their native language.

Adjusted Speech: The teacher changes speech patterns to increase student comprehension. This could include facing the students, paraphrasing, clearly indicating the most important ideas, and speaking more slowly.

Visuals: The teacher uses graphics, pictures, visuals, and manipulatives. This helps ELL students better understand and comprehend the subjects at hand.

Front-Loading Vocabulary: The teacher front loads vocabulary. This means providing students with a list of important vocabulary words they will need to know for a book, lesson, etc. prior to the lesson being taught. Including pictures to go with the vocabulary words is also very beneficial for the students.

Special Education Students

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Oral Reading: The teacher will read work orally to students. Class work such as tests and literature circles may need to be read aloud to the student.

Timers: The teacher will use timers as an instructional tool. The use of timers is beneficial for students who have trouble completing tasks. Timers can be helpful so the student is aware of how much time they have to complete an assignment.

Students with 504 Plans

Chunking: The teacher presents information in a way that makes it easy for students to understand and remember. Chunking is based on the presumption that our working memory is easily

overloaded by excessive detail. The best way to deliver information is to organize it into meaningful units. Because students with special needs get overloaded easily, chunking is an effective strategy to use with them.

Checking for Understanding: It is important to constantly check for understanding, especially for students who have accommodations. Teachers want to make sure students understand the concepts being covered in a way that makes sense to them.

Extra time: The teacher provides students with special needs extra time to complete work or answer questions. It is important to give students enough time to process their thoughts.

Gifted & Talented Strategies

Extensions/Enrichments: Teachers will provide gifted and talented students with extension/enrichment projects. Students will be challenged to further their understanding, to apply acquired knowledge, and/or to produce something in reference to acquired knowledge.

Modify/Change Activities: Teachers will monitor and modify activities to accommodate those students who need to be challenged further. Additional reading, problem-solving, writing, or project work is necessary for those students who are ready to move on at a rate more accelerated than their peers. In this way, G & T students are provided the same opportunity for support as special needs students.

Students at Risk of School Failure

Directions or Instructions: Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten.

Peer Support: Peers can help build confidence in other students by assisting in peer learning. Many teachers use the 'ask 3 before me' approach. This is fine, however, a student at risk may have to have a specific student or two to ask. Set this up for the student so he/she knows who to ask for clarification before going to you.

Alternate or Modified Assignments: Always ask yourself, "How can I modify this assignment to ensure the students at risk are able to complete it?" Sometimes you'll simplify the task, reduce the length of the assignment or allow for a different mode of delivery. For instance, many students may hand something in, the at-risk student may jot notes and give you the information verbally. Or, it just may be that you will need to assign an alternate assignment.

Increase One to One Time: When other students are working, always touch base with your students at risk and find out if they're on track or needing some additional support. A few minutes here and there will go a long way to intervene as the need presents itself.

Contracts: It helps to have a working contract between you and your students at risk. This helps prioritize the tasks that need to be done and ensure completion happens. Each day write down what needs to be completed, as the tasks are done, provide a checkmark or happy face. The goal of using contracts is to eventually have the student come to you for completion sign-offs.

Hands On: As much as possible, think in concrete terms and provide hands-on tasks. This means a child doing math may require a calculator or counters. The child may need to tape record comprehension activities instead of writing them. A child may have to listen to a story being read instead of reading it him/herself.

Tests/Assessments: Tests can be done orally if need be. Break tests down in smaller increments by having a portion of the test in the morning, another portion after lunch and the final part the next day.

Seating: Seat students near a helping peer or with quick access to the teacher. Those with hearing or sight issues need to be close to the instruction which often means near the front.
