Learning to Teach & Develop an Educational Philosophy

Teaching is a demanding profession that requires making hundreds of decisions during a school day, managing 20 to 40 students hour after hour, analyzing data about learning, and interacting with parents and colleagues. Teaching requires high levels of sustained energy, effort and motivation. Yet it is a noble and joyful profession that can be very emotionally fulfilling. Our knowledge about teaching and learning is most useful to teachers when past knowledge is constantly rearranged and integrated with new ideas and new experiences. The knowledge, skills, attitudes and opinions we all bring to any situation have a powerful influence on our behavior and expectations. Learning to teach and how to apply this knowledge in the classroom is truly a developmental process.
