The Emergence of the First Global Age: Global Interactions and Colonialism

Beginning in the late 1400s, European nations explored the seas beyond Europe, hunting for an all-water route to Asia. They did not find it, but they did encounter two previously unknown continents—the Americas. They also built great trading empires in Asia. With their travels and trade, Europeans ushered in the first global age, bringing together people and civilizations from around the world.

In the late 1400s, the Spanish and other Europeans began to explore the Americas. The Europeans conquered Native Americans and competed for colonies. In Africa, the slave trade and power struggles created an era of turbulence. Exploration and trade led to increased contact between the peoples of Africa, Europe, and the Americas. A global exchange of plants, animals, institutions, and ideas permanently affected people's lives around the world.

Biodiversity and Humans

9-12.HS-LS4-6.LS4.D.1

Humans depend on the living world for the resources and other benefits provided by biodiversity. But human activity is also having adverse impacts on biodiversity through overpopulation, overexploitation, habitat destruction, pollution, introduction of invasive species, and climate change. Thus sustaining biodiversity so that ecosystem functioning and productivity are maintained is essential to supporting and enhancing life on Earth. Sustaining biodiversity also aids humanity by preserving landscapes of recreational or inspirational value.
