- Students will accurately transpose small musical samples to different keys while maintaining the correct intervals and relationships between note
- Students will analyze and discuss their compositions, explaining their choices of notes and rhythms and how they relate to the major scale.
- Students will analyze examples of transposed music, comparing the original key to the new key and discussing the impact of key changes on the mood and character of a piece
- Students will apply the in-depth knowledge of techniques of musical notation manipulation
- Students will articulate their understanding of transposition through discussions or written reflections, providing specific examples and contexts in which transposition is beneficial
- Students will compare and analyze different transcription methods, discussing the strengths and weaknesses of each approach
- Students will compare their melodies with those of their peers, providing constructive feedback and recognizing different approaches to melody writing.
- Students will compose a simple melody using notes that correspond to the major scale, focusing on creating a cohesive musical phrase.
- Students will correctly notate their compositions on manuscript paper, paying attention to rhythm, dynamics, and articulation.
- Students will engage in discussions about the importance of transcription in music education and composition, reflecting on how these skills contribute to overall musicianship
- Students will identify and discuss key components of music notation, including the staff, clefs, note values, and rests, ensuring a comprehensive understanding of written music
- Students will identify and discuss the reasons for transposition, including vocal range adjustments,

ease of performance, and adapting music for different instruments

- Students will perform their composed melodies on a major instrument, demonstrating proper technique and expression.
- Students will practice the skills of transposing music, rewriting pieces in different keys while maintaining the correct intervals and relationships between notes
- Students will practice transposing melodies and harmonies, demonstrating their understanding of music theory concepts such as scales, intervals, and chord structures

Essential Skills

- Students will correctly demonstrate, perform, identify, discuss, analyze, compare, draw, recognize, spell, transcribe, transpose or compose Composition whereby students will write a simple melody in the right hand/on major instrument
- Students will correctly demonstrate, perform, identify, discuss, analyze, compare, draw, recognize, spell, transcribe, transpose or compose Simple transcription whereby students will copy music by hand onto manuscript paper to develop skills in the actual writing of music notation.
- Students will correctly demonstrate, perform, identify, discuss, analyze, compare, draw, recognize, spell, transcribe, transpose or compose Transposition whereby students will be able to take small samples of music and change it to another key and give examples of reasons for doing so in the first place.
