Unit 5: The Changing Social World

Learning Objectives

- Contrast the various types of collectives and describe the explanations for collective behavior that have been proposed.
- Contrast the views of modernization theory and world-system theory on modernization in less-developed nations.
- Describe the types of social movements that exist and explain how they differ.
- Explain how cities evolved and why urbanization is such a recent event.
- Explain how the theories on social change have evolved.
- Identify factors that affect the size and structure of populations and explain how sociologists measure these factors
- Identify some of the positive and negative effects of modernization on social life and the natural environment.
- Identify the models that have been proposed to explain the structure of cities and summarize the theories that have been put forth to explain city life.
- Identify the preconditions necessary for collective behavior to occur and explain how they build on one another.
- Identify the stages present in the life cycle of social movements and describe ways in which the existence of social movements can be explained.
- Summarize how sociologists explain population change and describe the programs that have been instituted to control population growth.
- Summarize the theories that social scientists have offered to explain the process of social change

Technological innovation, economic interdependence, changes in population growth, migratory patterns, and the development, distribution, and use of natural resources offer challenges and opportunities that transcend regional and national borders.

SOC.6.2.12.GeoPP.6.a
