Unit Goals

Americans pride themselves on access to individual rights and liberties and the political system that protects these rights and liberties. These rights and liberties impact citizens on a day-to-day basis and, for many, are the most visible result of government. The Constitution provides for many civil rights and civil liberties but as we have traveled from 1787 into the present, the expansion and at times contraction of civil rights and civil liberties has become necessary. This is where the Supreme Court comes in. Basic to this part of the course is an analysis of the workings of the United States Supreme Court and familiarity with its most significant decisions. Students should examine judicial interpretations of various rights and liberties such as freedom of speech, assembly, and expression; the rights of the accused; and the rights of minority groups and women. For example, students should understand the legal, social, and political evolution following the Supreme Court’s decisions regarding racial segregation. This unit will also examine the 14th amendment and the doctrine of selective incorporation. Finally, students will examine the ways in which the Supreme Court’s decisions on these cases have shaped the path of social change in America.
