

# Biology Course Overview

Content Area: **English**  
Course(s):  
Time Period:  
Length:  
Status: **Published**

## **School Mission Statement**

---

The mission of Chartertech is to provide artists the opportunity to blend principles of artistic expression with cutting-edge technology, so artists will excel in academic, career, and civic pursuits and contribute to the harmony and productivity of the 21<sup>st</sup> century.

**Artistic integration:** Performing arts will be accessible to all artists as a skill and content area and will serve as a vehicle for imparting, enlivening, and motivating excellence in all academic topics, as well as providing a platform for learning multicultural appreciation and empathy, not just tolerance.

**Technological integration:** Technology will serve as the foundation for instructional delivery systems leading to knowledge acquisition, concept understanding, and skill mastery in all academic subjects. Technology will not be studied as a separate entity but infused into the very fabric of educational pursuits, exactly as it occurs in the business world. Artists will be prepared to compete in the modern workplace or post-secondary institution.

*"Education has always been torn between vocational and utilitarian purposes on one hand and creative and holistic purposes on the other... We are rapidly entering a world that is hard to imagine. By developing the problem-solving skills, creativity, and discipline required in the arts, artists can prepare for life in the 21<sup>st</sup> century."*

From Understanding How the Arts Contribute to Excellent Education

National Endowment for the Arts, 1991

## **School Goals**

---

### **Goals for Arts Education:**

**Artists will learn the knowledge, skills, and abilities necessary to turn their passions and gifts in the arts into vocations or serious avocations.**

Objective 1: Each year, each artist will take two semesters (10 credits) of career-oriented training (80 minutes per day) in their artistic major.

Objective 2: Each marking period, each artist will perform or produce frequently, in diverse settings and for diverse audiences.

Objective 3: Artistic instruction will be integrated into the study of all academic subjects.

Objective 4: Each year, each artist will complete at least twenty after-school “lab” hours in their artistic major. These will constitute career-oriented service to the school and/or community, and demonstrate accomplishment of the NJCCCS crosscutting workplace readiness standards.

**Goal for Technology:**

**Chartertech will model the technology-intense workplace and artists will be able to compete successfully and perform well in a technology-intense workplace.**

Objective 5: Each artist will routinely use technology in a workplace-like manner to acquire, analyze, communicate, and present information in every subject.

Objective 6: Each artist will have access to a computer every day, every class so that automated sources will be the main conduit for educational content.

Objective 7: All administrative and instructional functions of the school will be supported by the most modern technology available.

**Goals for Academic Achievement:**

**Artists will apply themselves in the serious pursuit of knowledge and skills, especially skills in critical thinking, problem solving, decision making, and communication.**

Objective 8: Each year, and to be promoted to the next grade each artist will pass five credits in English, Health, Social Studies, Science, Mathematics, and PE/Health. Between grades 9-12 artists will also complete 1 year of Spanish.

Objective 9: In each academic subject, each year, each artist will complete a significant project that involves critical thinking, problem solving, decision making, and communication skills, and which demonstrates cross-content workplace readiness skills.

Objective 10: Each year artists will develop a artist resume to guide his/her academic and artistic studies and to document his/her academic and artistic accomplishments. This work will be done under the mentorship of the faculty in the artist’s artistic major.

Objective 11: Academic instruction in all subjects will be highly cross-curricular, in accordance with curricula design and continuously improved by teachers, in compliance with the New Jersey Artist Learning Standards.

**Course Description**

---

<b>Course Title:</b>	Biology
<b>Department:</b>	Science
<b>Prerequisite:</b>	General Science
<b>Number of Credits:</b>	5
<b>Grade Level(s):</b>	10

<b>Standards:</b>	Aligned to NJSLA Science Standards
<b>Description of Course</b>	This course is designed as a general science course focusing on Biological Science. Laboratory studies will be accomplished through virtual labs, simulations, and real-world applications, with the goal being the enhancement of student understanding and development of quantitative skills and appreciation of biological scientific principles. The utilization of scientific inquiry, interactive experiences, higher order thinking, collaborative projects, real world application through labs and a variety of assessments all aid the artists in ultimately demonstrating a vast understanding of the importance of biological properties of varieties of organisms and how all are interconnected while enabling them to apply these properties to their everyday lives. Throughout the course, artists will be presented with opportunities to integrate the arts through projects, midterm evaluations, presentations, and other assignments.

### Overview & Pacing

Unit #	Major Content	Expected Time
Unit 1: Nature of Life	a. Characteristics of living things	1 Week
Unit 2: Chemistry of Life	a. Carbon compounds b. Macromolecules c. Enzymes d. pH	3 Weeks
Unit 3: Ecology	a. energy flow b. trophic levels c. biological communities d. stability e. biodiversity	3 Weeks
Unit 4: Cell Structure and Function	a. All living things are made of cells b. Organelles	3 Weeks
Unit 5: Photosynthesis and Cellular Respiration	a. Energy production b. Light energy turned into sugar c. Sugar as a source of energy for both plants and animals	5 Weeks
Unit 6: Cell Growth, Division and Reproduction	a. Mitosis b. Meiosis c. Binary fission d. Multicellular organisms	3 Weeks
Unit 7: Genetics and DNA	a. DNA b. Genes c. Mutations d. Traits	3 Weeks
Unit 8: Genetic Engineering	a. Technology b. DNA	3 Weeks

	c. Genetics d. Biotechnology	
Unit 9: Evolution and Diversity	a. Diversity b. Change over time	3 Weeks
Unit 10: Classification	a. Nomenclature b. Cladogram c. Six kingdoms of life	3 Weeks
Unit 11: Plant Structure and Function	a. Functions b. Structure c. Flowering plants reproduction	3 Weeks
Unit 12: Introduction to Animal and Evolution and Diversity	a. Characteristics of animals b. Diversity through evolution	3 Weeks
<b>Total</b>		36 Weeks
