Unit 3: Momentum

Learning Objectives

- What is momentum and impulse and how are they related?
- What is the difference between momentum and inertia?
- Why does momentum have a role in the physical world?

Essential Skills

- Define the impulse given to an object
- Define the momentum of an object.
- Recognize that unbalanced forces change the momentum of an object.

Standards

- | | |
|---------------|---|
| 9-12.HS-PS2-1 | Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration. |
| 9-12.HS-PS2-3 | Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision. |
| 9-12.HS-PS2-2 | Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system. |
