Rationale and Transfer Goals

Overview of Framing Your Thoughts:

Framing Your Thoughts is a supplementary scripted program that begins with breaking sentences down to their component parts using sentence frames, symbols, and hand signals. These lessons start with identifying subjects and predicates, their functions, and then applying this knowledge in the creation of their own sentences. This teaches students ways to build sentences with more complexity.

Format of a Lesson:

- Anticipatory Set
 - Input/Direct Statement
 - Model (I Do)
 - Active Participation (We Do)
 - Checking for Understanding (You Do)
-

Overview of the Writing Workshop Framework:

Writing Workshop is a framework for writing instruction that includes a whole group mini-lesson, independent writing time, conferencing with groups and individuals, and sharing writing with peers and classmates. The purpose is to guide students as they write across genres and to develop independent, engaged writers. Minilessons range from management to genre exploration to craft techniques to editing. Teachers analyze student writing and look at skill progressions to make instructional decisions.

Format of a Lesson:

- Mini-Lesson
- Independent writing/conferencing
- Closure/sharing

Enduring Understandings

General Writing

1. Kindergarten students can construct simple sentences using basic vocabulary and proper word order to convey ideas clearly.
2. Kindergarten students can create narratives by expressing their ideas through pictures, dictation, or simple sentences, showing an understanding that stories have a beginning, middle, and end.
3. Kindergarten students can use foundational writing mechanics, such as holding a pencil correctly, forming letters and simple words legibly, and understanding basic punctuation and capitalization rules to communicate effectively through writing.

Narrative Writing

- 1). Students understand that narratives have a clear beginning, middle, and end, which helps organize their

thoughts and ideas.

- 2). Students recognize that characters in stories can have different personalities, feelings, and motivations, which makes the story more engaging.
- 3). Students learn that the setting of a story (where and when it takes place) influences the plot and helps create a vivid picture in the reader's mind.
- 4). Students understand that their own experiences and feelings can serve as inspiration for their narratives, allowing them to share their unique perspectives.
- 5). Students appreciate the importance of using descriptive language to paint a picture in the reader's mind, making the story more interesting and relatable.
- 6). Students recognize that narratives often include a problem or conflict that characters face, along with a resolution that brings the story to a satisfying conclusion.
- 7). Students learn how to sequence events logically in their narratives to ensure the story flows smoothly and makes sense to the reader.

Essential Questions

General Writing

1. Why do we write?
2. How do we make our writing clear for others to understand?
3. What happens when we put our ideas into writing?
4. How can we improve our writing?
5. What makes a good story?

Career Awareness, Exploration, Preparation, and Training

Life Literacies & Key Skills

Life Literacies

Understanding Visuals: Teach children how to interpret and create visual elements in their stories, like

illustrations and photographs.

Asking Questions: Encourage curiosity and teach children how to ask questions to gather information for their stories.

Key Skills

- **Communication Skills:**
- **Oral Expression:** Develop speaking skills by having children share their stories aloud.
- **Listening Skills:** Teach active listening by having children listen to their peers' stories and provide positive feedback.
- **Vocabulary Building:** Expand vocabulary through storytelling, encouraging the use of descriptive words
- **Fine Motor Skills:**
- **Handwriting:** Practice fine motor skills through letter formation and writing.
- **Drawing and Crafting:** Use drawing as a complementary skill to writing, which also develops hand-eye coordination.

TECH.9.4.2.CI	Creativity and Innovation
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).

Interdisciplinary Connections

ELA.L.RF.K.1.B	Recognize that spoken words are represented in written language by specific sequences of letters.
ELA.L.RF.K.1.C	Understand that words are separated by spaces in print.
ELA.L.WF.K.1.C	Write left to right and include a space between words.
ELA.L.WF.K.1.D	Identify the letters used to represent vowel phonemes and those used to represent consonants, knowing that every syllable has a vowel.
ELA.L.WF.K.1.E	Write a common grapheme (letter or letter group) for each phoneme. Asking questions, making observations, and gathering information are helpful in thinking about problems. Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem's solutions to other people.
