Rationale

The theme of this unit focuses on Mystery & Wonder. Recommended texts for this unit include informational texts sourced from district-approved materials. Through these texts exploring Mystery & Wonder, students will investigate how inquiry and critical thinking help us explore and understand mysterious phenomena. By the end of this unit, students will recognize how investigating mysteries and wonders enhances our understanding of the world and fosters a spirit of exploration. They will draw connections among the various texts studied throughout the unit.

Mastery will be evaluated through a benchmark test that assesses students' ability to determine theme and central ideas, cite textual evidence, draw conclusions, and analyze various elements of the text. The unit will also assess students' proficiency in informational writing, emphasizing their skill in organizing ideas logically and using detailed evidence to explain complex concepts and intriguing topics. Additionally, students will engage in discussions and collaborative activities to demonstrate their understanding of how mysteries and wonders captivate our imagination and can be explored through scientific inquiry and critical thinking. These activities will develop students' critical thinking, reading, writing, and communication skills, essential for both academic growth and personal development.
