Rationale

Following students' study of *Born a Crime*, this unit continues the course's exploration of the relationship between the individual and society through William Golding's *Lord of the Flies*. As an allegorical novel, *Lord of the Flies* examines the fragile balance between civilization and savagery, challenging students to consider how social structures, leadership, morality, fear, and human nature influence individual behavior. Through close reading, students analyze Golding's use of characterization, symbolism, irony, and allegory to develop enduring themes related to power, order, responsibility, and the consequences of societal breakdown.

As students trace the boys' descent from cooperation to chaos, they examine the tension between individual responsibility and collective expectations while evaluating the factors that sustain—or undermine—a civilized society. The novel invites students to analyze how authority, fear, group dynamics, and ethical decision-making shape human behavior and influence the choices individuals make within a community. By engaging with literary analysis alongside historical and philosophical contexts, students develop evidence-based interpretations of complex texts while exploring questions that remain relevant in contemporary society. Building on themes established in earlier units, students continue to investigate the course's enduring questions: *How do individuals shape society, and how does society shape the individual?* and *What responsibilities do individuals have in preserving a just and civilized society?*

Throughout the unit, students strengthen college- and career-ready literacy skills by analyzing complex literary texts, evaluating multiple perspectives, participating in collaborative discussions, and composing analytical and research-based writing supported by relevant textual evidence. In addition to literary analysis, students complete the *Destination Unknown* research project, in which they investigate a distant destination, develop a realistic travel itinerary within a specified budget, and present their findings through a multimedia presentation. As part of this authentic research experience, students evaluate sources, synthesize information from multiple perspectives, and investigate how climate, seasonal weather patterns, natural hazards, infrastructure, cultural considerations, and other regional conditions may influence travel to their selected destination. The project reinforces research, organization, critical thinking, and presentation skills while providing meaningful opportunities to apply information literacy to a real-world task.

Evaluating a Speaker's Point of View (ELA.SL.ES.11–12.3): - Evaluate a speaker's point of view, reasoning, and use of evidence when discussing themes related to civilization and savagery. - Assess the stance, premises, links among ideas, word choice, points of emphasis, and tone used. Adapting Speech (ELA.SL.AS.11–12.6): - Adapt speech to various contexts and tasks, demonstrating a command of formal English when indicated or appropriate for discussions and presentations.	Speaking Collaborative Discussions: - Participated effectively in collaborative discussions, building on others' ideas and expressing their own clearly in discussions about themes in <i>Hamlet</i> and <i>Beowulf</i>. - Engaged in various formats of discussions, including one-on-one, group, and teacher-led settings. Presenting Information: - Presented information and findings clearly and logically in research projects and discussions on <i>Beowulf</i> and <i>Hamlet</i>. - Ensured presentations were well-developed and suited to the task, purpose, and audience. Adapting Speech: - Adapted speech for different contexts and tasks, demonstrating a command of formal English when appropriate, in presentations and discussions.

Interdisciplinary Connections

How does this unit connect to standards in other disciplines? Add the appropriate **NJ SLS** here, keeping grade bands in mind. This is done by clicking "actions" and then "add standards".

1	Make sense of problems and persevere in solving them
3	Construct viable arguments and critique the reasoning of others
8	Look for and express regularity in repeated reasoning
G.MG.A.2	Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot).
G.SRT.A.2	Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.
ETW	Effects of Technology on the Natural World
HS-PS2	Motion and Stability: Forces and Interactions
HS-PS2-1	Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.
HS-PS2-2	Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.
HS-LS2	Ecosystems: Interactions, Energy, and Dynamics
HS-LS2-1	Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.
HS-LS2-6	Evaluate the claims, evidence, and reasoning that the complex interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem.
6.2.12.CivicsPI.4.a	Compare and contrast socialism, communism, fascism, and liberal democracy, analyze the extent to which they promote and protect civil, political, social and economic rights for people, and explain the reasons for their growth or decline around the world.
HS-LS2-7	Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.
HS-LS2-8	Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.

HS-LS3	Heredity: Inheritance and Variation of Traits
6.2.12.HistoryUP.4.b	Report on the influence of war, economic depression, and genocide on the arts, cultural values, and social ideas.
6.2.12.HistoryCA.4.b	Assess the causes of revolution in the 20th century (i.e., Russia, China, India, and Cuba), and determine the impact on global politics.

HS-LS4	Biological Evolution: Unity and Diversity
HS-LS4-2	Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.
HS-LS4-4	Construct an explanation based on evidence for how natural selection leads to adaptation of populations.
